Heat and Alterity in Contemporary Dance Ananya Chatterjea,2020-10-28 This book argues that contemporary dance imagined to have a global belonging is vitiated by euro white constructions of risk and currency that remain at its core Differently the book reimagines contemporary dance along a South South axis as a poly centric justice oriented aesthetic temporal category with intersectional understandings of difference as a central organizing principle Placing alterity and heat generated via multiple pathways at its center it foregrounds the work of South South artists who push against constructions of tradition and white centered aesthetic imperatives to reinvent their choreographic toolkit and respond to urgent questions of their times In recasting the grounds for a different global stage the argument widens its scope to indicate how dance making both indexes current contextual inequities and broader relations of social economic political and cultural power and inaugurates future dimensions of justice Winner of the 2022 Oscar G Brockett Prize for Dance Research **Haydn, Mozart, and the Viennese School, 1740-1780** Daniel Hartz,1995 Historians have long tried to place the music of Haydn and Mozart in the lineage of German Lutheran music In this book Daniel Hartz shows that the first Viennese school grew from a Catholic inheritance in Italian music and from local tradition with an admixture of French currents The generation of

composers led by Haydn no longer trained in Italy By the time young Mozart joined the ranks of the Viennese school its accomplishments towered above all others of the time The author s approach can be compared to viewing a majestic mountain range in its totality the highest peaks take on even greater majesty when seen in their natural context of foothills and lesser peaks This is how Haydn and Mozart were viewed by their contemporaries whose world of perception Heartz recreates using among other things the visual art of the period His focus is on music as a part of cultural history at a particular time and place Stylistic terms and a priori periods matter less to him than the common denominators of geography culture and political history Book jacket
