Under the Cap of Invisibility Lucie Genay, 2025-05-13 Pantex was built during World War II near the town of Amarillo Texas The site was converted early in the Cold War to assemble nuclear weapons and produce high explosives For nearly fifty years Pantex has been the sole assembly and disassembly plant for nuclear weapons in the United States Today most of the activities of the plant consist of the manufacture of high explosive components and the dismantlement or life extension of weapons including retrofitting aging warheads in the United States's arsenal Unlike the much more famous nuclear weapons production sites at Los Alamos Oak Ridge Hanford and Rocky Flats the Pantex plant has drawn little attention hidden under a metaphoric cap of invisibility Lucie Genay now lifts that invisibility cap to give the world its first in depth look at Pantex and the people who have spent their lives as neighbors and employees of this secretive industry The book investigates how Pantex has impacted local identity by molding elements of the past into the guaranty of its future and its concealment It further examines the multiple facets of Pantexism the reasons for embracing nuclear weapons production as a solution to economic woes the resulting dependence on this industry and the unconditional support for the facility through the voices of native and adoptive Panhandlers

The Prospect of Nuclear Jihad in South Asia Musa Khan Jalalzai, 2015-10-01 When we talk about Pakistan's

nuclear weapons armed forces and civilian governments then controversies and uninvited misperceptions swirl in our minds If we take in the broad picture we inevitably conclude that not all is going in the right direction in the country and that is because the army politicians and the establishment perceive jihadism as a profitable business They run this business of killings and torture through their proxies While we study the militarized mind of Pakistani generals and recognize their resentment towards civilian governments we find more controversies about the role of armed forces and their relationship with worldwide terrorist organizations International journalist Musa Khan Jalalzai is ideally positioned to present us with a picture of what is actually afoot and what it means for the future When we study the militarized mind of Pakistani generals and recognize their resentment towards civilian institutions we find more controversies about the role of armed forces and their relationship with worldwide terrorist organizations The Pakistan military controls the financial market stock exchange real estate business banking sector and smuggling of narcotics Ethnic representation within the armed forces raises serious concerns Some experts say this is not a national army but view it as the club of Pashtun and Punjabi generals The army has failed to develop a true ethnic representation process or motivate Baloch and Sindhis to join the armed forces but they certainly have gained experience in killing innocent civilians Then there is the question of the Saudi investment in Pakistan s Islamic nuclear bomb Saudi Arabia s link with Pakistan s nuclear and missile program has long been the source of speculation that Pakistan might either station nuclear forces on Saudi sand or provide a nuclear umbrella to the Wahabi state in return for oil supply or that the Saudis would purchase nuclear weapons from Pakistan International journalist Musa Khan Jalalzai is ideally positioned to present us with a picture of what is actually afoot and what it means for the future

The Mobilized American West, 1940-2000 John M. Findlay, 2023-07 In the years between 1940 and 2000 the American Far West went from being a relative backwater of the United States to a considerably more developed modern and prosperous region one capable of influencing not just the nation but the world By the dawn of the twenty first century the population of the West had multiplied more than four times since 1940 and western states had transitioned from rural to urban becoming the most urbanized section of the country Massive investment both private and public in the western economy had produced regional prosperity and the tourism industry had undergone massive expansion altering the ways Americans identified with the West In *The Mobilized American West 1940 2000* John M Findlay presents a historical overview of the American West in its decades of modern development During the years of U S mobilization for World War II and the Cold War the West remained a significant distinct region even as its development accelerated rapidly and in many ways it became better integrated into the rest of the country By examining events and trends that occurred in the West Findlay argues that a distinctive region wide political culture developed in the western states from a commitment to direct democracy the role played by the federal government in owning and managing such a large amount of land and the way different groups of westerners identified with and defined the region While illustrating western distinctiveness Findlay also aims to show how in its sustaining mobilization for war the region

became tethered to the entire nation more than ever before but on its own terms Findlay presents an innovative approach to viewing the American West as a region distinctive of the United States one that occasionally stood ahead of at odds with and even in defiance of the nation *Weapons of Mass Destruction* Eric A. Rocket States: Atomic Weaponry and the Cultural Imagination Fabienne Collignon,2014-07-31 Rocket States crosses the disciplines of Cold War Studies American Literature American Studies and Cultural Studies The particular attraction of this study lies in the combination of its range close textual and visual analysis of the correlations between land and weaponry set firmly within its political and cultural contexts with its unique analytical approach The book offers a synthesis between history theories of technology theories of space popular culture literary study and military science It illuminates a variety of literary texts from key writers and thinkers such as Pynchon Stephen King Norman Mailer and Tom Wolfe while also invoking figures like Nikola Tesla James Webb Batman and Ronald Reagan Organised topographically according to how missile technology manifests itself differently in particular locations Rocket States's geographical targets are Colorado Kansas Cape Canaveral and New York variously titled Excavation Preservation Evacuation and Transmission It advances through these states roughly chronologically beginning in the late 1940s and early 1950s and coming to an end in the first part of the 21st century Collignon's argument is concerned with identifying the recurring figures and fantasies of the Cold War the dome or parabola as sheltering techno form the fictions of total security adapting to constantly changing targeting strategies gadget love closed freezing worlds As such Rocket States analyses by what processes the Cold War is frequently literalised in its weapons installations and how these facilities in turn shape dreams of containment survival escape and techno supremacy

Command and Control Eric Schlosser,2014-08-26 The Oscar shortlisted documentary Command and Control directed by Robert Kenner finds its origins in Eric Schlosser's book

and continues to explore the little known history of the management and safety concerns of America's nuclear arsenal. A devastatingly lucid and detailed new history of nuclear weapons in the U.S. Fascinating. Lev Grossman, TIME Magazine. Perilous and gripping. Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety. San Francisco Chronicle. A myth-shattering exposé of America's nuclear weapons. Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America's nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism, and technological breakthroughs. Command and Control explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved, and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first-rate thriller, Command and Control interweaves the minute-by-minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers, and military officers to ensure that nuclear weapons can't be stolen, sabotaged, used without permission, or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance crews, and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences, and how the most brilliant minds in the nation can only provide us with an illusion of control. Audacious, gripping, and unforgettable, Command and Control is a tour de force of investigative journalism, an eye-opening look at the dangers of America's nuclear age.

The Atomic Bomb and American Society Rosemary B. Mariner, G. Kurt Piehler, 2009. Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions. First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial-scale manufacturing, and unparalleled military deployment, shape U.S. foreign policy, the communities of workers who produced it, and society as a whole? And second, how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolved under the influence of mass media, scientists, public intellectuals, and even the entertainment industry? In answering these questions, *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb, the

role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of *Remembering War the American Way* and *World War II in the American Soldiers Lives Series* as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History*
