Making Human Rights Work Globally:

Making Human Rights Work Globally Anthony Woodiwiss, 2012-09-10 This book is one of the first studies in the new field of the sociology of human rights and it centres its analysis on labour rights Such rights are of critical importance in this field work being the defining aspect of many peoples lives and a central concern of sociology *Making Sovereign Financing and Human Rights Work* Juan Pablo Bohoslavsky, Jernej Letnar Cernic, 2014-12-01 Poor public resource management and the global financial crisis curbing fundamental fiscal space millions thrown into poverty and authoritarian regimes running successful criminal campaigns with the help of financial assistance are all phenomena that raise fundamental questions around finance and human rights They also highlight the urgent need for more systematic and robust legal and economic thinking about sovereign finance and human rights This edited collection aims to contribute to filling this gap by introducing novel legal theories and analyses of the links between sovereign debt and human rights from a variety of perspectives These chapters include studies of financial complicity UN sanctions ethics transitional justice criminal law insolvency proceedings millennium development goals global financial architecture corporations extraterritoriality state of necessity sovereign wealth and hedge funds project financing state responsibility international financial institutions the right to development UN initiatives litigation as well as case studies from Africa Asia and Latin America These chapters are then theorised by the editors in an introductory chapter In July 2012 the UN Human Rights Council finally issued its own guidelines on foreign debt and human rights yet much remains to be done to promote better understanding of the legal and economic implications of the interface between finance and human rights This book will contribute to that understanding as well as help practitioners in their everyday work The authors include world renowned lawyers and economists experienced practitioners and officials from international organisations ***Making Human Rights a Reality*** Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights In many countries though there is little relationship between international law and the actual protection of human rights on the ground Making Human Rights a Reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk Emilie Hafner Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities Hafner Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population *The Harmonisation of National*

Legal Systems Antonios E. Platsas, 2017-10-27 This book offers a novel perspective on the leading concept of harmonisation advocating the mutual benefits and practical utility of harmonised law Theoretical models and factors for harmonisation are explored in detail Antonios E Platsas acknowledges a range of additional factors and presents harmonisation as a widely applicable and useful theory **Advanced Introduction to the Politics of International Human Rights** David P.

Gostin, Benjamin Mason Meier, 2020-07-15 Human rights are essential to global health yet rising threats in an increasingly divided world are challenging the progressive evolution of health related human rights It is necessary to empower a new generation of scholars advocates and practitioners to sustain the global commitment to universal rights in public health Looking to the next generation to face the struggles ahead this book provides a detailed understanding of the evolving relationship between global health and human rights laying a human rights foundation for the advancement of transformative health policies programs and practices International human rights law has been repeatedly shown to advance health and wellbeing empowering communities and fostering accountability for realizing the highest attainable standard of health This book provides a compelling examination of international human rights as essential for advancing public health It demonstrates how human rights strengthens human autonomy and dignity while placing clear responsibilities on government to safeguard the public's health and safety Bringing together leading academics in the field of health and human rights this volume 1 explains the norms and principles that define the field 2 examines the methods and tools for implementing human rights to promote health 3 applies essential human rights to leading public health threats and 4 analyzes rising human rights challenges in a rapidly globalizing world This foundational text shows why interdisciplinary scholarship and action are essential for health related human rights placing human rights at the center of public health and securing a future of global health with justice **Transnational Lawmaking Coalitions for Human Rights** Nina

Reiners, 2021-12-02 Transnational Lawmaking Coalitions is the first comprehensive analysis of the role and impact of informal collaborations in the UN human rights treaty bodies Issues as central to international human rights as the right to water abortion torture and hate speech are often only clarified through the instrument of treaty interpretations This book dives beneath the surface of the formal access procedures and actors of the UN treaty body system to reveal how the experts and external collaborators play a key role in the development of human rights Nina Reiners introduces the concept of Transnational Lawmaking Coalitions within a novel theoretical framework and draws on a number of detailed case studies and original data This study makes a significant contribution to the scholarship on human rights transnational actors and

international organizations and contributes to broader debates in international relations and international law *The Contentious History of the International Bill of Human Rights* Christopher N. J. Roberts, 2014-10-31 Today the idea of human rights enjoys near universal support yet there is deep disagreement about what human rights actually are their true source of origin how to study them and how best to address their deficits In this sweeping historical exploration Christopher N J Roberts traces these contemporary conflicts back to their moments of inception and shows how more than a half century ago a series of contradictions worked their way into the International Bill of Human Rights the foundation of the modern system of human rights By viewing human rights as representations of human relations that emerge from struggle this book charts a new path into the subject of human rights and offers a novel theory and methodology for rigorous empirical study

International Attention and the Protection of Human Rights Defenders Janika Spannagel, 2023-06-16 This book uses a practice driven and empirically founded approach to address the question of whether and how international attention can protect and enable domestic human rights activists in authoritarian settings It examines the untold origin story of the human rights defender term and its uptake among international advocacy organizations which coalesced with the rise of a theory of human rights change centered around the support for local actors Rich with analyses of original qualitative and quantitative data the author spells out this theory of change and tests its assumptions in two case studies the individual casework of the UN special procedures and the case of Tunisia under Ben Ali This book is of key interest to scholars and students of human rights of the United Nations and more broadly of international relations and politics in general and to practitioners working with human rights defenders at risk Reconstructing Human Rights Joe Hoover, 2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with

special status It is the foremost international human rights norm protecting persons from attacks on their dignity and integrity Consequently it has been at the forefront of a series of developments in international human rights law and international law more broadly Having withstood sustained challenges to its absolute nature in the war on terror it has broadened its scope of application becoming more sophisticated and complex in the process The prohibition of torture increasingly interacts with other fields of human rights law such as non discrimination law international criminal law international humanitarian law and international migration law The Transformation of the Prohibition of Torture in International Law analyses the nature and significance of this transformation and looks into the scope of the prohibition s further evolution Empirical scholarship innovative human rights body practice and challenges from activists particularly from the Global South have focused on the relational nature of torture and other ill treatment its embeddedness in wider structures of power and the role of international law in legitimizing if not facilitating widespread suffering from mass incarceration to poverty and climate change This analysis reveals an inherent tension in the prohibition between a conventional narrow focus on direct State violence and a wide lens encompassing myriad forms of suffering To retain its validity and effectiveness in the twenty first century argues Lutz Oette the prohibition on torture must navigate this tension and successfully address and transform abusive power asymmetries
