Making Of A Neuromorphic Visual System:

The Making of a Neuromorphic Visual System Christoph Rasche,2005-12-06 This book presents an approach to the construction of a visual system which is behaviorally computationally and neurally motivated The goal is to characterize the process of visual categorization and to find a suitable representation format that can successfully deal with the structural variability existent within visual categories The book reviews past and existent theories of visual object and shape recognition in the fields of computer vision neuroscience and psychology The entire range of computations is discussed as are region based approaches and are modeled with wave propagating networks A completely novel shape recognition architecture is proposed that can recognize simple shapes under various degraded conditions It is discussed how such networks can be used for constructing basic level object representations It is envisioned how those networks can be implemented using the method of neuromorphic engineering   **Neuromorphic Systems** Leslie S. Smith,Alister Hamilton,1998 Neuromorphic systems are implementations in silicon of sensory and neural systems whose architecture and design are based on neurobiology This growing area proffers exciting possibilities such as sensory systems that can compete with human senses and pattern recognition systems that can run in real time The area is at the intersection of neurophysiology computer science and electrical engineering This book brings together recent developments in Europe and the US so that researchers in both academia and industry can find out about the state of the art As well as elementary material on what neuromorphic systems are and why they are growing in importance the book contains details of current work Them are articles on aspects of implementing sensory neuromorphic systems as well as articles on neuromorphic hardware   Advanced Computational Paradigms and Hybrid Intelligent Computing Tapan Kumar Gandhi,Debanjan Konar,Biswaraj Sen,Kalpana Sharma,2021-12-06 This book presents high quality peer reviewed papers from the Third International Conference on Advanced Computational and Communication Paradigms ICACCP 2021 organized by Department of Computer Science and Engineering CSE Sikkim Manipal Institute of Technology SMIT Sikkim India during 22 24 March 2021 ICACCP 2021 covers an advanced computational paradigms and communications technique which provides failsafe and robust solutions to the emerging problems faced by mankind Technologists scientists industry professionals and research scholars from regional national and international levels are invited to present their original unpublished work in this conference   **Modern Data Architecture in AI** Abhik Choudhury,Praneeth Puchakayala,Aishwarya Badlani,2025-08-22 DESCRIPTION Building effective AI solutions demands a robust data architecture capable of handling vast diverse and real time data This book aims to provide a deep exploration of the tools technologies strategies and best practices that necessitate the design implementation and management of data architectures tailored to AI The book starts by introducing fundamental concepts of modern data architecture for AI laying the groundwork for understanding its importance It then digs deep into the aspects of data ingestion and collection strategies Subsequently it discusses data storage and management techniques that cater specifically
