Physician Practice Management Lawrence F. Wolper, 2005 Health Sciences Professions *Oxford Textbook of Communication in Oncology and Palliative Care* David William Kissane, Barry D. Bultz, Phyllis N. Butow, Carma L. Bylund, Susie Wilkinson, 2017 Communication is a core skill for medical professionals when treating patients Cancer and palliative care present some of the most challenging clinical situations This book provides evidence based guidelines alongside case examples tips and strategies to achieve effective patient centred communication **The Different Faces of Autonomy** M. Schermer, 2013-04-17 Patient autonomy is a much discussed and debated subject in medical ethics as well as in healthcare practice medical law and healthcare policy This book provides a detailed and nuanced analysis of both the concept of autonomy and the principle of respect for autonomy in an accessible style The unique feature of this book is that it combines empirical research into hospital practice with thorough philosophical analyses As such it is an example of a new movement in applied ethics that of empirical ethics The key themes are informed consent and medical decision making personal well being competence paternalism and decision making for incompetent patients Much attention is also devoted to autonomy in non decision making situations patient control over small everyday aspects of care authenticity and existential aspects of illness autonomy and the ethics of care and the relationship between autonomy and trust in the physician patient relationship This book will be of interest to those working or studying in the field of medical ethics and applied ethics but also to healthcare professionals and health policy makers *The Making of the Ideal Physician* Mansel and Wilson Rosenow, J. K. Mansel, 2017-08-12 If you haven't already needed medical care the time will come What are your expectations for your physician and or your health care provider What do you want your doctors to know to help them help you Edward C Rosenow III MD J Keith Mansel MD and Walter R Wilson MD have a combined 100 plus years of experience in medicine and medical education They are sharing that expertise with members of the medical community to help them better navigate the patient interaction and also offer them practical guidance as they move through their careers The authors begin with advice about medical education for students who are planning a career in the health care field Readers will learn about the career process from residencies to fellowships to private practice or academic medicine From the beginning of the book to the end the focus always is on patients and remembering that every doctor should help their patients in the most professional manner possible and always with empathy In addition the book includes a bonus chapter for patients who will learn how to make the most of their time when they are with their health care providers *The Making of a Physician* Harry L. Graber, 2016 Both genetic and environmental factors play important roles in one's life Genetics remains a fixed entity whereas environment is a variable Environmental experiences in life can have a positive or negative influence upon the genetic makeup of a given individual Decision making in the preschool environment is predominantly controlled by parents Eventually the individual being influenced by the many past environmental factors becomes the responsible choice maker as to which path in life he

she wishes to travel It is my belief that it is providential that one is given these experiences to aid in our decision making This concept was supported by five of the physicians who shared their stories chapter 10 All were greatly influenced by role models whom they encountered in their earlier life This influence factor is not a single event but a continuum This forms the basis of the concept that the making of a physician is not a one time event but represents a continuum For some of us becoming a physician was understood as a calling The stories in this book were shared so that others may develop a greater appreciation of their own environmental experiences and consider them as influential factors in the decision making of their lives It is also my hope that this book might be of positive help to the young person considering the medical profession as his or her vocation
