Making Of Mind:

Making Mind Gregory F. Tague, 2014-01-01 Making Mind Moral Sense and Consciousness in Philosophy Science and Literature posits the genesis of narrative as an adaptive function stemming from consciousness and moral sense The book is unique with its idea of the individual character evolving narrative in relation to the group Central to the argument is the claim that prehistorically consciousness and moral sense intersected to form narrative More than addressing the origin of story the book examines and explains the evolution of narrative The book is an interesting study of how our species inherited moral sense can differ dramatically from one individual to another While mores pertain to a group narrative comes from and is processed by the individual and reaches its high point in the novel We see how the moral sense works in characters as a monitor and we feel it operating in us as readers in terms of approval or not

Mind Making Patrick Roberts, 2009-12-16 This book is not on philosophy science or reality but why and how minds might invent such things The laws of mind not the laws of gravity or electricity but the methods of the mind that made these tools It is not on brains of neurons controllers or computers but the logical possibilities of mind from minimal axioms deducing all the kinds of mind that are and can ever be Mind Making applies original artificial intelligence research to precisely define mind On that foundation author Patrick Roberts advances ancient questions of free will reality and ethics Deeper the book offers a scientific method for resolving philosophical questions How to prove a model of mind Only by testing an analogous combination of entirely mindless parts Otherwise you remain trapped in endless debates never reaching certainties because you can't suspend your own mind Twenty five hundred years of futile verbal philosophical debate ends Philosophy becomes an engineering problem Machine mind m outperformed mind n in a statistically significant set of tests n's assumptions about reality are wrong m's are right and are complete because m contains no minds but those we made To the psychologist Mind Making offers a model of the human mind unburdened by the technicalities of neurons and chemistry To the engineer designs for more reliable powerful machines To the philosopher proven ultimate reality To the lay reader better knowledge of his mind and of his world as an effect of that mind These laws of mind are all that can be true for everyone everywhere forever They can't be false because they made truth Always true you need never doubt them In your mind they are the last possessions you can lose By comparison all other knowledge is trivia
