## **Making Of The Republican Citizen:**

An Unfinished Republic David Strand, 2011-07-06 Strand eloquently joins political theories to historical reinterpretation offering a cogent and multifaceted re reading of China's political culture in the twentieth century An Unfinished Republic is a stunning book of scholarly imagination diligence and sophistication Wen Hsin Yeh Richard H Laurie C Morrison Professor in History Walter Elise Haas Professor in Asian Studies Director Institute of East Asian Studies University of California Berkeley An Unfinished Republic proposes a compelling new interpretation of early twentieth century Chinese history It opens up unvisited avenues of inquiry into the uniquely Chinese mode and meaning of Republicanism and remaps the trajectory of Chinese politics over the course of the century Strand is a particularly thoughtful and well read scholar who commands knowledge of a range of literatures including political science cultural history women's history and political philosophy He adeptly uses tools from all of these fields to support fresh insight into how Chinese Republicanism was understood and more importantly into how it was practiced Joan Judge author of *The Precious Raft of History The Past the West and the Woman Question in China* **The Making of the Republican Citizen** Henrietta Harrison, 2023 Being a modern citizen of the Chinese republic meant repudiating the rituals that had previously defined one as Chinese This book uses new sources to look at the political history of the period and the relations between citizen and state A Political Sociology of Educational Knowledge Thomas A. Popkewitz, Jennifer Diaz, Christopher Kirchgasser, 2017-01-20 Bringing together the sociology of knowledge cultural studies and post foundational and historical approaches this book asks what schooling does and what are its limits and dangers The focus is on how the systems of reason that govern schooling embody historically generated rules and standards about what is talked about thought and acted on about the nature of children about the practices and paradoxes of educational reform These systems of reason are examined to consider issues of power the political and social exclusion The transnational perspectives interrelate historical and ethnographic studies of the modern school to explore how curriculum is translated through social and cognitive psychologies that make up the subjects of schooling and how educational sciences act to order and divide what is deemed possible to think and do The central argument is that taken for granted notions of educational change and research paradoxically produce differences that simultaneously include and exclude *Republican Citizens, Precarious Subjects* Jeremy F. Lane, 2020 Over recent decades concerns at the increased scarcity and precarity of salaried employment have dominated political struggles theoretical debates and cultural representations in France This study argues that such concerns are evidence of a profound shift in contemporary French economy culture and society Engaging with work in political economy and sociology the book sketches a new interpretative framework the better to understand the nature and implications of these profound changes It examines the challenges such changes have posed to fundamental French republican values arguing they have opened up a rift between older notions of French republican citizenship and the precarious forms of subjectivity characteristic of post Fordist labour The book traces

the symptoms of this rift in a range of cinematic and literary representations of the contemporary workplace as these depict the dilemmas faced the trajectories followed and the geographical regions inhabited by French workers of different ages sexes social classes and ethnicities

**To Be a Citizen** James R. Lehning, 2018-09-05 France's Third Republic confronts historians and political scientists with what seems a paradox it is at once France's most long lived experiment with republicanism and a regime remembered primarily for chronic instability and spectacular scandal From its founding in the wake of France's humiliation at the hands of Prussia to its collapse in the face of the Nazi Blitzkrieg the Third Republic struggled to consolidate the often contradictory impulses of the French revolutionary tradition into a set of stable democratic institutions To Be a Citizen is not an institutional history of the regime but an exploration of the political culture gradually formed by the moderate republicans who steered it In James R Lehning's view that culture was forced to reconcile conflicting views of the degree of citizen participation a republican form of government should embrace The moderate republicans called upon the entire nation to act as citizens of the Republic even as they limited the ability of many including women Catholics and immigrants to assume this identity and to participate in political life This participation based on universal male suffrage alone was at odds with the notion of universal citizenship the tradition of direct democracy as expressed in 1789 1793 1830 and 1848 Lehning examines a series of events and issues that reveal both the tensions within the republican tradition and the regime's success It forged a political culture that supported the moderate republican synthesis and blunted the ideal of direct democracy To Be a Citizen not only does much to illuminate an important chapter in the history of modern France but also helps the reader understand the dilemmas that arise as political elites attempt to accommodate a range of citizens within ostensibly democratic systems

*Articulating Citizenship* Robert Culp, 2020-03-23 At the genesis of the Republic of China in 1912 many political leaders educators and social reformers argued that republican education should transform China's people into dynamic modern citizens social and political agents whose public actions would rescue the national community Over subsequent decades however they came to argue fiercely over the contents of citizenship and how it should be taught Moreover many of their carefully crafted policies and programs came to be transformed by textbook authors teachers administrators and students Furthermore the idea of citizenship once introduced raised many troubling questions Who belonged to the national community in China and how was the nation constituted What were the best modes of political action How should modern people take responsibility for public matters What morality was proper for the modern public This book reconstructs civic education and citizenship training in secondary schools in the lower Yangzi region during the Republican era It also analyzes how students used the tools of civic education introduced in their schools to make themselves into young citizens and explores the complex social and political effects of educated youths' civic action

**New Narratives of Urban Space in Republican Chinese Cities**, 2013-03-27 The nine empirical studies in *New Narratives of Urban Space in Republican Chinese Cities* organized under the general framework of urban space examine three critical

dimensions of the great urban transformation in Republican China social legal and governance orders Together these narratives suggest a new perception of this historical urbanism While modern economic development was a major drive for Chinese urban transformation this volume highlights the dimension of the multilayered forces that shape urban space by looking into that less quantifiable but equally important cultural realm and by exposing the ways in which these forces created new urban narratives which became themselves shapers of urban space and of our perception of the Republican urbanity

**The Political Education of Democratus** Brian W. Dotts, 2012-03-15 Thomas Paine described the American Revolution as educative However as examined in Brian W Dotts *The Political Education of Democratus* Negotiating Civic Virtue during the Early Republic what was learned was neither standardized nor uniform The Federalists for example viewed the revolution as a triumph for representative government but one intended to maintain many remnants of the colonial experience Anti Federalists saw a confirmation of representative government at the state and local levels and considered the revolution as authenticating Montesquieu's theories of republicanism A third more extreme interpretation of the revolution emerged from radical democrats who viewed the revolution as a fundamental break with mainstream thinking about republicanism These radicals helped turn conventional understanding of representative government upside down taking part in unconventional or extra constitutional action during their negotiation of citizen virtue during the 1790s Members of each of the societies took an active part in trying to fulfill their expectations for the new American experiment by contributing to the democratization of republicanism *The Political Education of Democratus* illuminates the emergence of democratic thought from Aristotle and Machiavelli to more contemporary influences from the British Commonwealth tradition Dotts examines how the radical ideas of Algernon Sidney James Harrington John Milton Joseph Priestley and Thomas Paine develop a rich tapestry among the democratic society's correspondence constitutions resolutions and early media Individual members of the Democratic Republican Societies including Philip Freneau Robert

Coram Benjamin Bache George Logan and others energized these radical interpretations of civic republican thought and plunged headlong into party politics educating early Americans about the practical potentialities of democratic action

**Privacy in the Republic** Andrew Roberts, 2022-07-12 This book rethinks the idea of privacy It argues that a satisfactory account of privacy should not limit itself to identifying why privacy might be valuable It also needs to attend to the further question of how it can be secured in those circumstances in which it proves to be valuable Drawing on republican ideas about the relationship between freedom and self government the book asserts that privacy is valuable because it enables us to lead non dominated lives It prevents others from acquiring power to interfere in our choices to remove options that would otherwise be available to us and to manipulate our decision making It further examines the means through which citizens might exercise effective control over decisions and actions that affect their privacy and proposes a democratic theory of privacy With the emergence of the surveillance state this volume will be indispensable for scholars students and researchers in political theory political philosophy law and human and civil rights It will be of particular interest to policymakers lawyers and human rights activists

René Koekkoek,2020-01-23 The Citizenship Experiment explores the fate of citizenship ideals in the Age of Revolutions While in the early 1790s citizenship ideals in the Atlantic world converged the twin shocks of the Haitian Revolution and the French Revolutionary Terror led the American French and Dutch publics to abandon the notion of a shared Atlantic revolutionary vision of citizenship Instead they forged conceptions of citizenship that were limited to national contexts restricted categories of voters and advanced stages of civilization Weaving together the convergence and divergence of an Atlantic revolutionary discourse debates on citizenship and the intellectual repercussions of the Terror and the Haitian Revolution Koekkoek offers a fresh perspective on the revolutionary 1790s as a turning point in the history of citizenship Superstitious Regimes

Rebecca Nodostup,2010-07-01 We live in a world shaped by secularism the separation of numinous power from political authority and religion from the political social and economic realms of public life Not only has progress toward modernity often been equated with secularization but when religion is admitted into modernity it has been distinguished from superstition That such ideas are continually contested does not undercut their extraordinary influence These divisions underpin this investigation of the role of religion in the construction of modernity and political power during the Nanjing Decade 1927 1937 of Nationalist rule in China This book explores the modern recategorization of religious practices and people and examines how state power affected the religious lives and physical order of local communities It also looks at how politicians conceived of their own ritual role in an era when authority was meant to derive from popular sovereignty The claims of secular nationalism and mobilizational politics prompted the Nationalists to conceive of the world of religious association as a dangerous realm of superstition that would destroy the nation This is the first superstitious regime of the book s title It also convinced them that national feeling and faith in the party state would replace those ties the second superstitious regime Citizenship and National Identity

David I. Miller,2013-05-31 A good political community is one whose citizens are actively engaged in deciding their common future together Bound together by ties of national solidarity they discover and implement principles of justice that all can share and in doing so they respect the separate identities of minority groups within the community In the essays collected in this book David Miller shows that such an ideal is not only desirable but feasible He explains how active citizenship on the republican model differs from liberal citizenship and why it serves disadvantaged groups better than currently fashionable forms of identity politics By deliberating freely with one another citizens can reach decisions on matters of public policy that are both rational and fair He couples this with a robust

defence of the principle of nationality arguing that a shared national identity is necessary to motivate citizens to work together in the name of justice Attempts to create transnational forms of citizenship in Europe and elsewhere are therefore misguided He shows that the principle of nationality can accommodate the demands of minority nations and does not lead to a secessionist free for all And finally he demonstrates that national self determination need not be achieved at the expense of global justice This is a powerful statement from a leading political theorist that not only extends our understanding of citizenship nationality and deliberative democracy but engages with current political debates about identity politics minority nationalisms and European integration
