Phillips,Jeansok J. Kim,Daeyeol Lee, The brain is the organ of decision making and evolved to maximize the outcomes desirable for the survival and reproduction of the species Compared to the sensory and motor functions of the brain however the process of decision making is less accessible to direct experimental manipulations and hence requires more careful theoretical analyses Indeed the principle of optimality and frequent departures of human behaviors from those predicted for optimal rational decision makers have long been studied experimentally as well as theoretically However it is only recently that neurobiological studies of decision making started exploiting the framework previously developed in economics and psychology systematically This cross disciplinary research program known as neuroeconomics has already been enormously successful Increasingly neuroscientists benefit from the studies of utility theory game theory prospect theory and reinforcement learning theory and contribute to the refinement of such theories by providing more relevant empirical data This Research Topic will showcase the recent advances in neuroeconomics that combine economic and behavioral analyses in neurobiological studies of value based decision making

Undermining Racial Justice Matthew Johnson,2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial justice Despite knowing that racial disparities would likely continue Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity What Johnson contends in Undermining Racial Justice is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary The case of the University of Michigan fits into a broader

pattern at elite colleges and universities and is a cautionary tale for all in higher education As Matthew Johnson illustrates inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide      **Sigma Nu fraternity delta** ,1900      Nominations to the U.S. Department of Commerce and the Federal Trade Commission United States.
