Mathematical Puzzles Diversions 2nd Bo:

The Second Scientific American Book of Mathematical Puzzles and Diversions Martin Gardner, 2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal clear prose illuminated corners of mathematics especially recreational mathematics that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one before Gardner had written about mathematics like this. They continue to be a marvel. This volume originally published in 1961 contains columns published in the magazine from 1958-1960. This is the 1987 edition of the collection and contains an afterword written by Gardner at that time.

Hex Ryan B. Hayward, 2022-02-03 This book offers a gentle introduction to Hex, the classic board game created by Piet Hein and popularized by John Nash and Martin Gardner. The first three chapters cover rules, basic strategy, and history. The remaining eight chapters cover a variety of topics: mathematical properties (there are no draws, the first player can win, the acute corner is a losing first move, the related game of Y), winning strategies for small boards, how computers play Hex, and analysis of Random Move Hex (where one or both players move randomly) and Dark Hex (the imperfect information version of the game where you can't see your opponent's moves). Did we mention puzzles? There are puzzles in every chapter with solutions. This book is intended for anyone interested in playing board games or learning some recreational mathematics. It is written for a wide audience and will be enjoyed equally by general readers and professional mathematicians. The book could be used as a textbook or companion resource for a topics course on recreational mathematics or game theory, or as a source for undergraduate research questions.
