Mathematical Modelling Murray S. Klamkin, 1987-01-01 Designed for classroom use this book contains short self contained mathematical models of problems in the physical mathematical and biological sciences first published in the Classroom Notes section of the SIAM Review from 1975 1985 The problems provide an ideal way to make complex subject matter more accessible to the student through the use of concrete applications Each section has extensive supplementary references provided by the editor from his years of experience with mathematical modelling

Mathematical Modelling Dick Clements, 2008-11-06 This book based on a successful undergraduate course designed by the author describes mathematical modelling and its application to the solution of problems in industry and commerce In the early chapters of the book the author first sets out a clear introduction to the principles of mathematical modelling including sections on the various methodologies of mathematical modelling and their relationship to systems methodologies He then offers some insights into practical aspects of mathematical modelling and proceeds to describe the development and operation of the undergraduate course upon which the book is based In the later chapters seven case studies based on real problems contributed by mathematicians working in industry are introduced Each chapter describes a problem the solution originally adopted and variations on that solution introduced by students over a number of years use of the case studies

Mathematical Modelling J. Caldwell, Douglas K.S. Ng, 2004-03-31 Over the past decade there has been an increasing demand for suitable material in the area of mathematical modelling as applied to science engineering business and management Recent developments in computer technology and related software have provided the necessary tools of increasing power and sophistication which have significant implications for the use and role of mathematical modelling in the above disciplines In the past traditional methods have relied heavily on expensive experimentation and the building of scaled models but now a more flexible and cost effective approach is available through greater use of mathematical modelling and computer simulation In particular developments in computer algebra symbolic manipulation packages and user friendly software packages for large scale problems all have important implications in both the teaching of mathematical modelling and more importantly its use in the solution of real world problems Many textbooks have been published which cover the art and techniques of modelling as well as specific mathematical modelling techniques in specialist areas within science and business In most of these books the mathematical material tends to be rather tailor

made to fit in with a one or two semester course for teaching students at the undergraduate or postgraduate level usually the former This textbook is quite different in that it is intended to build on and enhance students modelling skills using a combination of case studies and projects *Mathematical Modelling: From Theory To Practice* Ngan Hoe Lee,Kit Ee Dawn Ng,2015-01-19 This book documents the journey undertaken by educators from the Mathematics and Mathematics Education MME Academic Group in the National Institute of Education NIE and Singapore schools during a Mathematical Modelling Outreach MMO event in June 2010 under the guidance of renowned experts in the field of mathematical modelling The main goal of MMO was to reach out to Singapore primary and secondary schools and introduce the potentials of mathematical modelling as a platform for eliciting mathematical thinking communication and reasoning among students This book contributes to the expanding literature on mathematical modelling by offering voices from the Singaporean context It suggests how theoretical perspectives on mathematical modelling can be transformed into actual practice in schools all within the existing infrastructure of the current Singapore mathematics curriculum More importantly the book provides documentary evidence on how plans put in place through MMO in 2010 have since been realised The publication of this book is hence timely at this juncture Not only does the book record how MMO was among the first pebbles launched into the pond it also serves as a bridge over which educators can stand upon to view how the ripple effect had developed from the initial MMO pebble and the directions it may continue to extend Perhaps in the process other ripples in the teaching learning and research of mathematical modelling can be created Mathematical Modelling D. N. P. Murthy,N. W. Page,Ervin Y. Rodin,1990 The critical step in the use of mathematics for solving real world problems is the building of a suitable mathematical model This book advocates a novel approach to the teaching of the building process for mathematical models with emphasis on the art as well as the science aspects Using a case study approach the book teaches the mathematical modelling process in a comprehensive framework presenting an overview of the concepts and techniques needed for modelling The book is structured in three parts the first dealing with the science aspect the second dealing with the art aspects and the third combining self learning exercises for the student and supplementary resource material for the instructor Mathematical Modelling J.
