Simmons,2016-11-17 Fads are as common in mathematics as in any other human activity and it is always difficult to separate the enduring from the ephemeral in the achievements of one s own time An unfortunate effect of the predominance of fads is

that if a student doesn't learn about such worthwhile topics as the wave equation Gauss's hypergeometric function the gamma function and the basic problems of the calculus of variations among others as an undergraduate then he/she is unlikely to do so later. The natural place for an informal acquaintance with such ideas is a leisurely introductory course on differential equations.
