Learning Disabilities Pol Ghesquière,A. J. J. M. Ruijsenaars,2005 Research on learning disabilities has known a tremendous growth the last 25 years Yet despite the progress that is made in diverse domains learning disabilities still stay a serious challenge to teaching and instruction In this book the authors try to link original research findings on learning disabilities with instructional methods and teaching practices The first part of the book

brings together contributions about the cognitive metacognitive and socio emotional correlates of learning disabilities These factors generally form a core aspect of the challenge of learning disabilities to teaching and instruction The first three chapters concern the phenomenon of dyslexia Van den Broeck critically evaluates the disputable role of intelligence in the concept and definition of dyslexia Hutchinson Whiteley and Smith explore the role of cognitive linguistic skills in the early identification of reading problems in emergent bilingual children Van Ingelghem and colleagues study auditory temporal processing in children with dyslexia In chapter 4 Desoete and Roeyers summarize their research on metacognition in children with mathematics learning disabilities Finally Gadeyne Ghesqui re and Onghena explore the relationship between academic achievement and behaviour problems The second part of this book goes deeper into research on intervention and instruction methods The first three chapters focus on reading problems Whitely and her colleagues try to analyze why some children do not benefit from early phonologically based interventions leading to implications for the development of early screening tools and intervention schemes for these non beneficiaries Van Kraaenord Rohl and Rivalland report findings of an Australian study examining the programs and strategies used to teach and intervene in Australian classrooms for students with learning problems Bouwer and Jordaan argue for the use of imaging as a learning support technique for children with dyslexia The last two chapters explore the differential effect of direct and guided instruction for children with arithmetic learning problems Kroesbergen and Van Luit focus on the acquisition and use of multiplication strategies Milo and Ruijsenaars do the same for addition and subtraction up to 100 After reading this book not all challenges of learning disabilities to teaching and instruction will be tackled But it surely can offer some contribution in getting away from some of them The authors hope it gives a lot of inspiration to the diverse audience we had in mind practitioners as well as researchers of different disciplines

Teaching Math to Students with Learning Disabilities John F. Cawley, Anne Hayes, Teresa E. Foley, 2008 This book includes two main sections a discussion of problem solving and a section on computation with whole numbers A primary theme of the text is that problem solving sets the stage for meaning and conceptual development with respect to numbers The section on problem solving includes numerous problem solving activities that have a dual purpose the enhancement of language comprehension and cognitive development and the enrichment of experiences in arithmetic problem solving The section on computation stresses the use of both traditional and alternative arithmetic algorithms The latter are introduced so as to provide the teacher with a means to enhance performance in the area of whole number arithmetic in such a way that the difficulties of the student are circumvented Providing a range of arithmetic activities useful in both the general education and special education settings the book addresses needs of students in both general education and special education
