Mathematics A Basic Course:

Mathematics, a Basic Course David G. Salten,1957 Fundamentals of Mathematics I Dan Ellison,Jane Knobles,Houston Independent School District,1979 *Mathematics [a Basic Course]* John R. Frankson,Milton Finkelstein,1970 **Basic Training in Mathematics** R. Shankar,1995-06-30 Based on course material used by the author at Yale University this practical text addresses the widening gap found between the mathematics required for upper level courses in the physical sciences and the knowledge of incoming students This superb book offers students an excellent opportunity to strengthen their mathematical skills by solving various problems in differential calculus By covering material in its simplest form students can look forward to a smooth entry into any course in the physical sciences **Mathematics, a Basic Course** David George Salten,Robert W. Dever,1971 **A Basic Course in Algebraic Topology** William S. Massey,2019-06-28 This textbook is intended for a course in algebraic topology at the beginning graduate level The main topics covered are the classification of compact 2 manifolds the fundamental group covering spaces singular homology theory and singular cohomology theory These topics are developed systematically avoiding all unnecessary definitions terminology and technical machinery The text consists of material from the first five chapters of the author s earlier book Algebraic Topology an Introduction GTM 56 together with almost all of his book Singular Homology Theory GTM 70 The material from the two earlier books has been substantially revised corrected and brought up to date School Mathematics Curricula Catherine P. Vistro-Yu,Tin Lam Toh,2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries unique approaches to supplementing school mathematics curricula it contributes to shaping effective policies for implementation assessment and monitoring of curricula The book covers a wide range of issues curriculum design localization of curricula directions of curricular reforms mathematics textbooks assessment within the curriculum and teachers professional development which are of interest to a wide international audience

Developmental Mathematics Margaret L. Lial,Diana L. Hestwood,Stanley A. Salzman,2007 Lial s Developmental Mathematics gives students the tools necessary to succeed in developmental math courses and prepares them for future math courses and the rest of their lives The Lial developmental team creates a pattern for success by emphasizing problem solving skills vocabulary comprehension real world applications and strong exercise sets In keeping with the proven Lial track record this book offers an effective design with many exercises and applications to enhance comprehension of basic mathematics and algebra **A Pilot Standard National Course Classification System for Secondary Education** ,1995

International Conference on Education and Management Science (ICEMS2014) , 2014-09-24 2014 International Conference on Education and Management Science ICEMS2014 will be held in Beijing China on August 19 20 2014 The main purpose of this conference is to provide a common forum for researchers scientists and students from all over the world to present their recent findings ideas developments and application in the border areas of Education and Management Science It will also report progress and development of methodologies technologies planning and implementation tools and standards in information systems Education is an internal topic It is a process of delivering knowledge in a basic meaning Humans are hard to define the actual definition of education But it is the key point for our society to step forward Management science is the discipline that adapts the scientific approach for problem solving to help

managers making informed decisions The goal of management science is to recommend the course of action that is expected to yield the best outcome with what is available **Educational Effectiveness Theory** Katharina Maag Merki, Marcus Emmerich, Monika Holmeier, 2018-10-11 Despite the advances in educational effectiveness theory and methodology in the last 20 years important questions and issues remain unresolved In particular existing theoretical frameworks of educational effectiveness are only able to describe the interrelationship among factors at the system school classroom and student levels and their cross level interdependency in a very general manner Additionally although a large number of studies provide empirical evidence of the impact of single factors and factor constellations on student learning the embedding of the empirically identified results in theoretical models of educational effectiveness has to be carried out more systematically in order to develop more elaborated theories of educational effectiveness The aim of this book is to contribute to the advancement of educational effectiveness theory by discussing different strategies including alternative theoretical models to understand educational in effectiveness extending the methodology to analyze processes and mechanisms of educational in effectiveness analyzing differential effects of processes and instruments on educational in effectiveness carrying out complex multivariate analyses considering manifest and latent variables and combining theory and practice in real school situations Taken together the strategies presented in this book make it clear that the advancement of educational effectiveness theory depends on the advancement of educational effectiveness methodology or in other words from theory to methodology and from empirical evidence back to theory This book was originally published as a special issue of School Effectiveness and School Improvement
