3rd Grade Geometry Success Mathematics Education in the Early Years Martin Carlsen,Ingvald Erfjord,Per Sigurd Hundeland,2020-03-13 This book gives insights in the vivid research area of early mathematics learning The collection of selected chapters mirrors the research topics presented at the fourth POEM conference in May 2018 Thematically the volume reflects the importance of this evolving area of research which has begun to attract attention in the spheres of education and public policy due to increased interest in early years learning The research foci of the chapters comprise children s mathematical reasoning early years mathematics teaching and the role of parents for children s mathematical development The 2018 conference included a wider range of researchers than previous years Guided Math Lessons in Kindergarten Nicki Newton,2021-11-29 Guided Math Lessons in Kindergarten provides detailed lessons to help you bring guided math groups to life Based on the bestselling Guided Math in Action this practical book offers 16 lessons taught in a round of three concrete pictorial and abstract The lessons are based on the priority standards and cover fluency word problems counting and cardinality and place value Author Dr Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems reason communicate their thinking model use tools use precise language and see structure and patterns Throughout the book you ll find tools templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away With the easy to follow plans in this book students can more work effectively in small guided math groups and have loads of fun along the way Remember that guided math groups are about doing the math So throughout these lessons you will see students working with manipulatives to make meaning doing mathematical sketches to show what they understand and can make sense of the abstract numbers When students are given the opportunities to make sense of the math in hands on and visual ways then the math begins to make sense to them *Teaching Mathematics as to be Meaningful – Foregrounding Play and Children’s Perspectives* Hanna Palmér,Camilla Björklund,Elin Reikerås,Jessica Elofsson,2023-10-29 This open access book s theme is Teaching mathematics as to be meaningful foregrounding children s play and perspectives It discusses the relation between teachers children and mathematical content within the context of

play with a particular focus on the framing of these relations within this context which is an important theme in the debate on whether teaching should be integrated with or separated from children's play. The work further addresses meaningfulness in the learning process particularly from the child's perspective. Globally most guidelines and curricula for early childhood education mention play as one of the key features for young children's learning. Still there are quite different views on the definitions of play and in what ways play should become part of children's learning. The chapters of the book mirror the research topics presented at the fifth POEM conference in May 2022 divided into four sub themes: Play and learning, Children's perspectives on mathematics, Teachers' competencies and Theorizing aspects of early mathematics education. **Early**

Childhood Teachers' Professional Competence in Mathematics Simone Dunekacke, Aljoscha Jegodtka, Thomas Koinzer, Katja Eilerts, Lars Jensen, 2021-09-30. This edited volume presents cutting edge research on the professional competence of early childhood mathematics teachers. It considers professional knowledge, motivational affective dispositions, skills and performance in early childhood mathematics and outlines future fields of research in this area. The book argues that it is essential for early childhood teachers to prepare a high quality learning environment and that mathematical competence is highly relevant for children's individual development. Bringing together research from mathematics education, educational science and psychology, it integrates international perspectives and considers the contextual factors that affect the development of children's mathematical competence within Early Childhood Education and Care (ECEC) settings. The book uses a model to describe professional teacher competence that considers the dispositions of early childhood teachers, situation specific skills of early childhood teachers and the performance of early childhood teachers. The book is the first of its kind to give a comprehensive overview and allows for integrative perspectives and interdisciplinary understanding regarding pre and in service ECEC teachers' professional competence in the domain of mathematics. It will be essential reading for academics, researchers and students of early childhood education, mathematics education and teacher education. Chapters 5, 6 and 13 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license. *Success with Lowercase Letters: Grades K-1 (Sylvan Workbooks)* Sylvan Learning (Firm), 2011-03-08.
