## **Matter And Man:**

**Matter and Man** Mikhail Vasilyev, Kirill Stanyukovich, 2000-04 This book deals in popular form with some of the main branches of modern physics. It tells of the universe and the laws governing the four states of matter and the three basic kinds of fields which man has got to know. It also considers some of the hypotheses concerning matter and the universe which must still be verified. It tells of the inroads into the universe which scientists are contemplating today with a view on the distant future. The authors present popular expositions of the fundamentals of gas dynamics, explosion theory and the dynamics of fields. Advances in these divisions of physics have made possible the great achievements of aviation, rocketry, hydraulic power production and thermal engineering. Some of the more complex physical phenomena are explained on simple examples from everyday life. Mikhail Vasilyev is a Soviet journalist and science popularizer whose books are known both in the Soviet Union and many other countries. His *Reportage from the 21st Century* has seen 25 printings in foreign countries. Other books of his include *Travels into Outer Space*, *Metals and Man*, *Energy and Man*, and *Nonmetals and Man*, the last three being parts of a big series under the general heading *The Universe and Man* on which he has been working for the last few years. Professor Kirill Stanyukovich is an eminent Soviet theoretical physicist. He is the author of numerous scientific works on gas dynamics, cosmology and gravitational theory, many of which have been translated into foreign languages. One of his major contributions is the monograph *Unsteady Gas Motion*. **Man or Matter** Ernst

Lehrs, 2022-09-04 In *Man or Matter* Ernst Lehrs delves into the intricate relationship between human consciousness and the material world, challenging traditional dichotomies that separate mind from matter. Set against the backdrop of early 20th century philosophical inquiry, Lehrs employs a rich tapestry of literary styles, merging philosophical discourse with poetic reflections. His exploration is heavily influenced by anthroposophy and the spiritual science movement, seeking to bridge the gap between scientific rationalism and spiritualism. Through his keen analysis, Lehrs presents a compelling case for a profound interconnectedness, positing that humanity must recognize its role within the cosmos. Ernst Lehrs was a notable figure in anthroposophical circles, deeply influenced by the teachings of Rudolf Steiner. His educational pursuits in philosophy and the natural sciences provided him with a robust foundation in both scientific inquiry and metaphysical exploration. This duality shaped his perspective in *Man or Matter* as he sought to articulate a vision of humanity that transcends mere materialism, embedding rich spiritual dimensions into everyday existence. This book is a must-read for anyone intrigued by the philosophical underpinnings of human existence and the metaphysical implications of modern science. Lehrs' eloquent prose not only enlightens but also inspires readers to reflect upon their own consciousness in relation to the universe, making it an essential addition to the libraries of philosophers, scientists, and spiritual seekers alike. **From Matter to Man** A. Redcote Dewar,2015-06-25 Excerpt from From Matter to Man A New Theory of the Universe The preliminary problem in all human speculation has ever been the origin of existence and it still frets the natural philosopher but the solution is partly determined by the definition of the problem and its accuracy for to day depends almost wholly upon the meaning which present intelligence attaches to the term origin Every origin in the universe necessarily includes both the thing made and that out of which it is made For as nothing begets nothing so something must be begotten of something As no definition of origin therefore however orthodox can be accurate which assumes a creation of something from nothing origin in so far as it refers to the universe is meaningless About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Hades; or, the Intermediate state of man* Henry CONSTABLE (Chaplain of the City of London Hospital for Diseases of the Chest.),1873
