curricula discourses      Material Powers Tony Bennett, Patrick Joyce, 2013-05-13 This edited collection is a major contribution to the current development of a material turn in the social sciences and humanities. It does so by exploring new understandings of how power is made up and exercised by examining the role of material infrastructures in the organization of state power and the role of material cultural practices in the organization of colonial forms of governance. A diverse range of historical examples is drawn on in illustrating these concerns from the role of territorial engineering projects in seventeenth century France through the development of the postal system in nineteenth century Britain to the relations between the state and road building in contemporary Peru for example. The colonial contexts examined are similarly varied ranging from the role of photographic practices in the constitution of colonial power in India and the measurement of the bodies of the colonized in French colonial practices to the part played by the relations between museums and expeditions in the organization of Australian forms of colonial rule. These specific concerns are connected to major critical re-examination of the limits of the earlier formulations of cultural materialism and the logic of the cultural turn. The collection brings together a group of key international scholars whose work has played a leading role in debates in and across the fields of history, visual culture studies, anthropology, geography, cultural studies, museum studies and literary studies.      **Returning to Scientific**

**Practice** Xu Zhu, Wu Tong, 2019-05-17 This book is a result from a collective study on philosophy of scientific practice (PSP) which began around 2002 and is still ongoing. There is an apparently increasing interest in scientific practice influenced by the historicist philosophy of science and the sociology of scientific knowledge (SSK). Prof. WU Tong and his research group believe that it is necessary for PSP to turn from the theory dominant position to the practice dominance. PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate in this study. In this book we have selected three main cases, namely Chinese medicine, Fengshui and Ethnobotany, to examine the effect of PSP. The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for reinterpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science, particularly made by Chinese scholars.      *Strange matter* Martin Bleisteiner, Jan-Peer

Hartmann, Andrew James Johnston, 2025-09-02 *Strange matter* offers exciting new perspectives on the premodern fascination with materiality and the various ways in which the Middle Ages and subsequent periods experienced things in time. Drawing on a wide selection of examples that range from medieval texts and artefacts of both European and non-European origin to Macbeth's highly evocative meditation on bubbles, the essays compiled in this volume look beyond the confines of the Anglophone world. As they engage critically with the specific temporal otherness modernity has so often ascribed to medieval texts and artefacts, the contributors also enter into productive dialogue with recent trends in criticism such as thing studies and the growing field of object biographies in cultural studies and museology.
