Educational Systems is vital reading for all those interested in the sociology of education. Previously published reviews of A large scale masterly study this book is the most important contribution to the sociology of education since the second world war as well as being a substantial contribution to the consolidation of sociology itself. The Economist I cannot improve on her own statement of what she is trying to do. The sociological contribution consists in providing a theoretical account of macroscopic patterns of change in terms of the structural and cultural factors which produce and sustain them. Unquestionably this book is an impressive work of scholarship well planned conceptually and uniting its theoretical base with a set of four thoroughly and interestingly researched case studies of the history of the educational systems of Denmark, England, France and Russia. British Journal of the Sociology of Education. This magnificent treatise seriously explores many of the most recalcitrant questions about institutional systems. Journal of Curriculum Studies. **Social Radicalism and Liberal Education** Lindsay Paterson, 2015-10-21. Liberal education used to command wide political support. Radicals disagreed with conservatives on whether the best culture could be appreciated by everyone and they disagreed too on whether the barriers to understanding it were mainly social and economic but there was no dispute that any worthwhile education ought to hand on the best that has been thought and said. That consensus has vanished since the 1960s. The book examines why social radicals supported liberal education why they have moved away from it and what the implications are for the future of an intellectually stimulating and culturally literate education.

*Capitalism and Social Progress* P. Brown, H. Lauder, 2001-02-13. Why are America and Britain wealthier than ever but millions of children live in poverty neighbourhoods want for basic amenities and the middle classes fear for their families jobs and futures. The answer is not to be found in globalization technological innovation or our personal failings to adapt to changing circumstances as we are so often told. The answer lies mainly with the historical legacy of the golden era and the obsession with market individualism. An obsession that the New Democrats in America and the New Labour in Britain have failed to exorcise. Yet the forces of knowledge driven capitalism provide an unprecedented opportunity at the beginning of the twenty first century to build societies based on the individual and collective intelligence of all. Capitalism and Social Progress shows how this can be achieved.

*Social Control and the Education of Adults in the Nineteenth and Early Twentieth Centuries* J. Jeffrey Robinson, 2013 An almost universal concern of the Victorian governing classes was with the question of social control how to deflect a largely uneducated working class from their inevitable challenge to the centres of power accepted value systems and existing authority structures The fear in which the masses were held by the middle and upper classes came to dominate access to education or more accurately to what they defined as useful knowledge since this was designed to instil the values of a just and ordered society Conversely for the working class it would give them power power over their own lives and in so doing provide access to that social hierarchy currently valued by the governing minority This book addresses the role of the providers of education alongside the responses of those for whom it was intended It discusses the provision of educational initiatives and the frequent attenuation of their founding objectives It assesses the utility of the strategies of power and control adopted by the providers in order to maintain an upper class ideology Though evidence is discussed in a national context it is supported by additional data from a rural county both for the purpose of comparative analysis and in order to add character and hear the true voice of the men and women involved
