New Dark Age:

New Dark Age James Bridle, 2018-07-17 *New Dark Age* is among the most unsettling and illuminating books I've read about the Internet which is to say that it is among the most unsettling and illuminating books I've read about contemporary life *New Yorker* As the world around us increases in technological complexity our understanding of it diminishes Underlying this trend is a single idea the belief that our existence is understandable through computation and more data is enough to help us build a better world In reality we are lost in a sea of information increasingly divided by fundamentalism simplistic narratives conspiracy theories and post factual politics Meanwhile those in power use our lack of understanding to further their own interests Despite the apparent accessibility of information we're living in a new Dark Age From rogue financial systems to shopping algorithms from artificial intelligence to state secrecy we no longer understand how our world is governed or presented to us The media is filled with unverifiable speculation much of it generated by anonymous software while companies dominate their employees through surveillance and the threat of automation In his brilliant new work leading artist and writer James Bridle surveys the history of art technology and information systems and reveals the dark clouds that gather over our dreams of the digital sublime

Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an eclectic collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them

Changing Arms Control Norms in International Society Kenki Adachi, 2021-04-29 When states survival is at stake do states behave according to norms do states refrain from using certain weapons based on norms against their use Adachi presents a comprehensive analytical framework for analysing norm dynamics incorporating the existing literature while expanding the norm life cycle model to address contestation of resistance to diffusion of and disappearance of norms He also examines the changing nature of international society and how the evolving characteristics of this society change how norms are shared His focus is on norms relating to the use and non use of weapons with examples of how norms developed in different places and at different times with regard to particular types of weapons From the banning of gun use in Japan under Bushido to international bans on chemical weapons and the foundation of norms on nuclear weapons he looks

not only at how such norms come about but how they can become contested or disappear A valuable contribution to the literature on norms in International Relations this volume will be of particular interest to scholars and students with an interest in the control of arms

Alternative Governance in the Northern Triangle and Implications for U.S. Foreign Policy Douglas Farah, Carl Meacham, 2015-10-06 This study examines different forms of alternative governance in the absence of a strong state presence in the Northern Triangle of Central America along part of the Guatemala Honduras border a region notorious for its soaring homicide rates corruption violence and emigration to the United States The purpose of the study is to shed light on the complex and interwoven issues that drive the current crisis of governance in the region and spill over with increasing frequency into strategic issues for the United States

Chromatic Algorithms Carolyn L. Kane, 2014-08-13 These days we take for granted that our computer screens and even our phones will show us images in vibrant full color Digital color is a fundamental part of how we use our devices but we never give a thought to how it is produced or how it came about Chromatic Algorithms reveals the fascinating history behind digital color tracing it from the work of a few brilliant computer scientists and experimentally minded artists in the late 1960s and early 70s through to its appearance in commercial software in the early 1990s Mixing philosophy of technology aesthetics and media analysis Carolyn Kane shows how revolutionary the earliest computer generated colors were built with the massive postwar number crunching machines these first examples of computer art were so fantastic that artists and computer scientists regarded them as psychedelic even revolutionary harbingers of a better future for humans and machines But Kane shows the explosive growth of personal computing and its accompanying need for off the shelf software led to standardization and the gradual closing of the experimental field in which computer artists had thrived Even so the gap between the bright bold presence of color onscreen and the increasing abstraction of its underlying code continues to lure artists and designers from a wide range of fields and Kane draws on their work to pose fascinating questions about the relationships among art code science and media in the twenty first century

House of Darkness House of Light Andrea Perron, 2014-08-11 Roger and Carolyn Perron purchased the home of their dreams and eventual nightmares in December of 1970 The Arnold Estate located just beyond the village of Harrisville Rhode Island seemed the idyllic setting in which to raise a family The couple unwittingly moved their five young daughters into the ancient and mysterious farmhouse Secrets were kept and then revealed within a space shared by mortal and immortal alike Time suddenly became irrelevant fractured by spirits making their presence known then dispersing into the ether The house is a portal to the past and a passage to the future This is a sacred story of spiritual enlightenment told some thirty years hence The family is now somewhat less reticent to divulge a closely guarded experience Their odyssey is chronicled by the eldest sibling and is an unabridged account of a supernatural excursion Ed and Lorraine Warren investigated this haunting in a futile attempt to intervene on their behalf They consider the Perron family saga to be one of the most compelling and significant of a famously ghost storied career as paranormal researchers During a

seance gone horribly wrong they unleashed an unholy hostess the spirit called Bathsheba a God forsaken soul Perceiving herself to be the mistress of the house she did not appreciate the competition Carolyn had long been under siege overt threats issued in the form of fire a mother's greatest fear It transformed the woman in unimaginable ways After nearly a decade the family left a once beloved home behind though it will never leave them as each remains haunted by a memory This tale is an inspiring testament to the resilience of the human spirit on a pathway of discovery an eternal journey for the living and the dead The Duel John Lukacs, 2001-03-11 This is a day by day account of the eighty day struggle in 1940 between Hitler poised on the edge of absolute victory and Churchill threatened by imminent invasion and defeat on the eve of the second World War A masterful book masterful in its portrayal of its protagonists masterful in its overall understanding of the death struggle in which they engaged masterful above all in its vivid suspenseful chronicling of the most momentous eighty days in the history of this century Geoffrey Ward This is a marvelous book John Lukacs has lucid unsentimental insight into the mind and character of both Churchill and Hitler Conor Cruise O'Brien A wonderful story wonderfully told George F Will It is salutary to be reminded in this powerful study how close Hitler came to winning in 1940 An impressive study written with elegance and panache Peter Stansky New York Times A master of narrative history on a par with Barbara Tuchman and Garrett Mattingly Kirkus Reviews **Attention and its Crisis in Digital Society** Enrico Campo, 2022-05-08 In the context of debates surrounding the effects of new technologies on our mental faculties particularly the attention span this volume addresses the notion of a deterioration of attention and the related ideas of cognitive overload an inability to concentrate and attention deficit disorder Through a new conceptualization of attention based not on individualistic or universalistic approaches but centered instead on the cultural and social variability of cognitive processes and the multiplicity of forces and environments that encourage stimulate and inhibit certain cognitive mechanisms the author rejects the idea of a degradation or crisis of attention and proposes an alternative vision of the problem of attention in contemporary societies Placing cultural conventions social norms and ecological environments at the forefront of our understanding of individual and collective attention Attention and its Crisis in Digital Society will appeal to scholars of sociology psychology and philosophy with interests in social theory cognitive processes and the criticisms often levelled at digital society and new technologies
