Creating and Digitizing Language Corpora J. Beal, K. Corrigan, H. Moisl, 2007-07-12 A range of electronic corpora has become accessible via the WWW and CD ROM This coincides with improvements in standards governing the collecting encoding and archiving of such data This book develops similar standards for enriching and preserving unconventional data the fragmentary texts and voices left to us as accidents of history **Real English** James Milroy, Lesley Milroy, 2014-06-03 While it is accepted that the pronunciation of English shows wide regional differences there is a marked tendency to underestimate the extent of the variation in grammar that exists within the British Isles today In addressing this problem Real English brings together the work of a number of experts on the subject to provide a pioneer volume in the field of the grammar of spoken English Translation, Humour and Literature Delia Chiaro, 2010-09-23 Translation studies and humour

studies are disciplines that have been long established but seldom looked at in conjunction This volume uses literature as the common ground and examines issues of translating humour within a range of different literary traditions It begins with an analysis of humour and translation in every day life including jokes and cross cultural humour and then moves on to looking at humour and translation in literature through the ages Despite growing interest and a history of collaborative study there has been little translation studies scholarship published in this area This collection features a comprehensive introduction by the editor which covers strategies and techniques for translating humour as well as the pragmatics involved The book will appeal to scholars and postgraduates in translation and interpreting studies and humour studies

World English(es) and the Multilingual Turn Annalisa Bonomo, 2017-01-06 The recent multilingual turn involves various different implicit and explicit language policies urging pressure and resistance with regard to the spread of English and its dominant relationships with other national languages As such this book considers the social value of communication as the basis of multilingualism and of the evolution of language systems The data presented here show English as being in the middle of the double listening of cultural mediation and the imperfect magnifying glass of translation with worldwide Standard English being but one of the many other related varieties which enjoy prestige on a large scale These varieties may be identified according to different features which make the plural world Englishes an umbrella term with blurred edges New approaches to dialects study have been developed in recent decades and cartographic mapping has overlapped with the emergence of a new dialectology which deals with the description of language phenomena as complex concepts where complexity provides a challenging framework for investigation and research of languages as dynamic systems made up of variables which mutually influence each other Thus dialectometry dialectology and standardization become interesting tools for measuring linguistic differences establishing language typologies and endorsing the systemic characteristics which can be formalized Comprehensive and well informed this volume will appeal to anyone interested in the spread of English from researchers and teachers to students providing them with a greater understanding of some examples of world Englishes analysed under the light of complexity as a product of global society

Creole and Dialect Continua Geneviève Escure, 1997-03-06 Although there is a substantial amount of

linguistic research on standard language acquisition little attention has been given to the mechanisms underlying second dialect acquisition Using a combination of function based grammar and sociolinguistic methodology to analyze topic marking strategies the unguided acquisition of a standard by speakers of nonstandard varieties is examined in two distinct linguistic and geographical situations in a Caribbean creole situation Belize with special attention to the acquisition of acrolects by native speakers of basilects and in a noncreole situation PRC documenting the acquisition of standard Chinese Putonghua by speakers of nonstandard varieties represented in Cultural Revolution literature Wuhan Chinese and Suzhou Wu story telling style In both cases psychosocial factors linguistic bias toward nonnative renderings of the standard varieties the social status of their speakers and related political and educational consequences play an important role in the development of second dialects The broad ranging analysis of a single feature of oral discourse leads to the formulation of cross linguistic generalizations in acquisition studies and results in an evaluation of the putative uniqueness of creole languages Related issues addressed include the effect of linguistic bias on the development and use of language varieties by marginalized groups the interaction of three major language components semantics syntax and pragmatics in spontaneous communication and the development of methods to identify discourse units The ultimate goal underlying the comparison of specific discourse variables in Belizean and Chinese standard acquisition is to evaluate the relative merits of substratal superstratal and universal explanations in language development The Geordie Dictionary Scott Dobson,1974
