New Horizons In Natural Gas Deregulation:

New Horizons in Natural Gas Deregulation Jerome R. Ellig, Joseph P. Kalt, 1996-01-19 In the natural gas industry competition and contracting are gradually replacing monopoly and regulation In this volume many leading economists who follow the gas industry present their views on current and future industry trends To help regulators and industry leaders better understand these changes and to reform regulation the authors apply economic theories of contestable markets public choice transaction costs and dynamic entrepreneurship to the gas industry The issues addressed in this work are crucial not just for the gas industry but for all industries that have traditionally been treated as regulated monopolies **Deregulation and Privatisation** Hector MacQueen, 2019-08-05 No detailed description available for Deregulation and Privatisation

Willig, 2002 Editor s description During the past two decades Latin American countries have

made pioneering efforts in reforming infrastructure services The first generation of reforms encompassed widespread privatization deregulation and restructuring of the provision of energy water transport and telecommunications services Second Generation Reforms in Infrastructure Services evaluates the current challenges leading to the consolidation of the initial reforms This volume deals with post privatization dispute settlement mechanisms access arrangements in network industries and inroads to effective competition in the reformed industries The authors evaluate a set of contractual adjustments resulting from renegotiations and disputes that have taken place since the beginning of the reform process In an effort to promote competition in the provision of public services the authors suggest some practical rules for pricing access in network industries The book presents a dynamic global vision of second generation reforms underway in energy markets around the world See more at <https://publications.iadb.org/handle/11319/310> sthash M23WTIKV dpuf **Dynamic**

Competition and Public Policy Jerome Ellig, 2001-04-23 Scholars explore antitrust issues as these relate to dynamic industry competition and public policy **Enron Ascending** Robert L. Bradley, Jr., 2018-03-09 A great fall cannot be understood apart from the rise that preceded it Enron Ascending is the only book to date that examines in detail the first two thirds of that iconic energy company's life Thus it is the only book to date that exposes the deepest causes of Enron's stunning collapse Nobel economist Paul Krugman predicted that history would look upon Enron's plummet as a greater turning point than the fall of the Twin Towers Enron Ascending explains the shock of the company's fall by recalling the astounding achievements of Enron's birth childhood adolescence and early maturity It sets forth the once celebrated but now forgotten industry and innovation that caused the company and its reputation to soar stratospherically At the same time always conscious of the company's fate the book highlights throughout the developing habits of thought and behavior that later evolved into self destructive acts of desperation and deceit Written fifteen years after the firm's demise Enron Ascending offers the long perspective of a uniquely positioned insider Robert L Bradley Jr the company's director of public policy analysis and Chairman Ken Lay's personal speechwriter The book also offers a library of previously unavailable information drawn from Bradley's innumerable corporate documents and unrepeatable interviews which he collected in his capacity as the company's prospective historian Most important however Enron Ascending offers an antidote to the unending stories studies and books about Enron that are presented as just the facts but are in reality shaped decisively by the worldview of their authors Bradley shows beyond dispute that the early habits which set precedents for Enron's history making demise were directly contrary to the free market behaviors and capitalist attitudes generally blamed for Enron's fall
