Towards Gender Equity in Mathematics Education

Gila Hanna,2006-04-11 THE REAL WORLD OF MATHEMATICS SCIENCE AND TECHNOLOGY EDUCATION In this Preface I would like to focus on what I mean by education and speak about the models and metaphors that are used when people talk write and act in the domain of education We need to look at the assumptions and processes that the models and metaphors implicitly and explicitly contain I feel we should explore whether there is a specific thrust to mathematics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems little point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the balanced interplay of knowledge and understanding can we expect to achieve genuine education *Teaching Mathematics* Pamela Cowan,2006-02-13 A practical introduction to Maths teaching designed specifically for beginning teachers in primary and secondary schools It brings together the latest DfES and TTA guidelines and requirements with authoritative guidance ensuring that readers feel confident about how to approach their role as a teacher This book explores key issues in maths teaching today including planning and classroom management assessment recording and reporting information and communication technology investigative mathematics equal opportunities special needs and differentiation key skills and alternative mathematics qualifications being an effective maths teacher personal and professional development in the early stages of a teaching career Art, Education and Gender Gill Hopper,2015-10-05 Why do girls study art and why do girls become primary teachers This book examines and reveals the powerful influence of the family the school and the state in shaping female identity and constructing notions of gender appropriateness It also discusses the status of art at school and the position of women artists in society

Unveiling the Power of Verbal Art: An Psychological Sojourn through **New Intermediate Gcse Mathematics**

In some sort of inundated with screens and the cacophony of instant transmission, the profound energy and mental resonance of verbal beauty frequently diminish in to obscurity, eclipsed by the continuous barrage of noise and distractions. Yet, set within the musical pages of **New Intermediate Gcse Mathematics**, a interesting perform of fictional brilliance that pulses with raw thoughts, lies an unique journey waiting to be embarked upon. Written with a virtuoso wordsmith, this exciting opus books readers on a psychological odyssey, delicately revealing the latent possible and profound impact stuck within the intricate web of language. Within the heart-wrenching expanse with this evocative examination, we can embark upon an introspective exploration of the book is key subjects, dissect their charming writing fashion, and immerse ourselves in the indelible impact it leaves upon the depths of readers souls.
