The New Lexicon Webster's Dictionary of the English Language Bernard S. Cayne, 1987 **The New Lexicon Webster's Encyclopedic Dictionary of the English Language**, 1988 The New Lexicon Webster's Dictionary of the English Language Bernard S. Cayne, 1987 A library of information in one single volume With more than 170 000 entries this dictionary is uncomplicated but scholarly and comprehensive **Nobel Universal Graphical Language** Milan Randic, 2010-05-24 Nobel is a pictographic language based on some 120 basic signs and many arrows of different shape that are mutually combined It is named after Alfred Nobel 1833-1896 Swedish chemist and industrialist inventor of dynamite who left most of his fortune to a foundation that annually gives awards to individuals whose work is characterized as greatest benefit to mankind known as Nobel Prizes Besides the awards for sciences and literature significantly Alfred Nobel included among others a prize for peace that besides individuals also organizations may obtain Although it would be utopian to believe that human conflicts could be avoided if communication tools would improve the emergence of universal languages certainly cannot make the situation worse Universal languages are a communication tool which makes it possible for people of no common language to communicate They are graphic but they should be distinguished from picture writings which only passively offer information on some event or give messages Universal languages have more similarity with the sign languages that are used for people who lost hearing or the sign language of American Plains Indians who spoke different languages and could communicate by sign language that they developed However written language has some advantages over hand sign languages in that one can communicate at a great distance particularly today in the age of fax and computer communications and that one can leave messages for posterity This is not the place to argue for or against the promise of written sign languages Graphic written sign languages exist today and the best known are Chinese characters used in China and Japan The problem with Chinese characters is that there are too many characters and it is difficult to learn so many It takes years for children in China and Japan to learn so many different characters and the task would be even harder for grown people to learn if they have not done this when young Nobel is designed to remove this difficulty and is based on the following requirements 1 SMALL NUMBER OF BASIC SIGNS 2 SIGNS SHOULD BE EASY TO RECOGNIZE 3 SIGNS SHOULD BE EASY TO REPRODUCE 4 COMBINATIONS LIMITED TO THREE SIGNS 5 COMPLEMENTARY We have already mentioned that Nobel uses about 120 basic signs which can be viewed as a small number particularly in view of over 100 signs of Nobel that are so obvious that they can be easily absorbed The other requirements are also very important There are many signs that can be easily recognized but in order to be acceptable for Nobel they also need to be easily reproduced because that will facilitate communication Also when making combinations of signs one has to make some restriction in order to maintain clarity so we decided to have no more than three signs combined into single word Finally the last requirement that of complementarities needs some explanation Besides having signs that one can easily recognize and easily draw one

needs some structure to be embedded into composition of signs that facilitates one to remember and learn signs easily We refer to this structure as complementary or broadly speaking associational and what it implies is that words and objects that are related should have related signs Thus for example pairs of words like man woman cat dog coffee tea good bad love hate etc should have signs that are in some opposition while words like smoke flame fire tree wood forest water sea ocean good better best should have signs that are in competition With this in mind when one sees and learns the basic signs the meaning of many combinations of signs can be in advance anticipated This helps one to learn Nobel rather fast not months not weeks perhaps not even days but a couple of hours may suffice that one may learn hundreds and hundreds of words In this respect Nobel may be unique among languages written spoken of *New Webster's Dictionary and Thesaurus of the English Language*, 1992

Expressions of Indigenous and Local Knowledge in Africa and its Diaspora Akinloye Ojo, Mobolanle Sotunsa, Karim Traore, 2016-06-22 Expressions of Indigenous and Local Knowledge in Africa and its Diaspora provides critical discourses on Africa and the various configurations of its reflections in folklore literature music languages and philosophy The collection through its selected works focuses on the African continent in terms of preserving the unique identity of African Indigenous and Local Knowledge In reality this preservation effort is confronted by a number of challenges within today's increasingly globalized and westernized world This book documents ongoing scholarly discussion on the paradoxical dynamics of preserving this identity and consequently enhancing the relevance of African Indigenous and Local Knowledge This volume articulates the representation of knowledge and values lodged in the diverse knowledge systems in Africa and its diaspora and which are constantly expressed in local and global spaces It highlights the prejudicial assessment of African Indigenous knowledge systems that has ensured that Western epistemological systems are internationally recognized and supported while African epistemological systems are denigrated discouraged or simply ignored even on the African continent Given that the term expressions entails making something known or manifest this edited collection is assembled to make known some of the elements of indigenous and local knowledge as well as the practices that these elements necessitate both historically and contemporarily in the African situation
