New Concepts In Contraception:

New Concepts in Contraception Malcolm Potts, Clive Wood, 1972 **Fertility Control — Update and Trends** Thomas Rabe, Benno Runnebaum, 2012-12-06 The name of Benno Runnebaum is closely tied to the status of gynaecological endocrinology and reproductive medicine and so it seemed appropriate to dedicate this conference book entitled Fertility Control to him in recognition of his achievements His clinical and research work is reflected in more than 450 original scientific publications and many young scientists and doctors from home and abroad have received their further clinical and scientific training in his department With this volume we would all like to thank Professor Runnebaum as a mentor and friend for his achievements in the field of gynaecological endocrinology and reproductive medicine **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **World Food Problem** Professor Miloslav Rechcigl, 2018-01-10 The aim of this publication is to provide the interested reader with an authoritative and comprehensive up to date bibliography on all important facets of the world food problem encompassing such questions as the availability of natural resources the present and future sources of energy environmental quality population growth world malnutrition the state of food production food consumption patterns future food needs toxicological aspects of food agricultural and industrial aspects of food production and family planning It is the first compilation of its kind in that it covers the subject from a multidisciplinary point of view including publications that deal with the description and analysis of the world food problem as well as those that offer alternative strategies and specific technological measures for alleviating the problem **Female Contraception** Benno Runnebaum, Thomas Rabe, Ludwig Kiesel, 2012-12-06 Contraceptives have always provided ground for controversy This book describes and discusses latest findings concerning the advantages as well as hazard and risk factors of contraception The clinical impact of oral contraceptives on metabolism is particularly highlighted In addition behavioral methods intrauterine devices implants and modern approaches in animal and clinical research in the field of immunization against pregnancy are considered Last but not least the book summarizes the complex ethical religious and political aspects of family planning and contraception *Fertility and Contraception in America: Domestic fertility trends and family planning services* United States. Congress. House. Select Committee on Population, 1978 **Catholics and Contraception** Leslie Woodcock Tentler, 2018-09-05 As Americans rethought sex in the twentieth century the Catholic Church's teachings on the divisive issue of contraception in marriage were in many ways central In a fascinating history Leslie Woodcock Tentler traces changing attitudes from the late nineteenth century when religious leaders of every variety were largely united in their opposition to contraception to the 1920s when distillations of Freud and the works of family planning reformers like Margaret Sanger began to reach a popular audience to the Depression years during which even conservative Protestant denominations quietly dropped prohibitions against marital birth control Catholics and Contraception carefully examines the intimate dilemmas of pastoral counseling in matters of sexual conduct Tentler makes it

clear that uneasy negotiations were always necessary between clerical and lay authority As the Catholic Church found itself isolated in its strictures against contraception and the object of damaging rhetoric in the public debate over legal birth control support of the Church's teachings on contraception became a mark of Catholic identity for better and for worse Tentler draws on evidence from pastoral literature sermons lay writings private correspondence and interviews with fifty six priests ordained between 1938 and 1968 concluding the recent history of American Catholicism can only be understood by taking birth control into account *Popular Magazines and Fiction in Shanghai, 1914-1925* Peijie Mao, 2021-12-02 This book explores the rise of Shanghai based popular magazines produced by the Mandarin Ducks and Butterflies School in early twentieth century China It examines the national gender family and social imaginaries constructed and negotiated through a complex network of relationships between popular writers magazine editors and their intended readers which were represented in various forms of popular narratives including patriotic stories war military stories family narratives domestic fiction utopian writings and industrial business stories The author argues that the national imagination social ideals and the notions of ideal womanhood and the new family were intrinsically linked and integral to the search for cultural identity of the emerging Chinese middle society and an expression of their collective sensibilities experiences and aspirations This book suggests that the cultural imaginaries configured in these magazine stories articulated a shared quest for modernity one that emphasized sentiment quotidian experience the pursuit of the modern family and individual success strengthening of the nation and the reinvention of cultural tradition Popular magazines and fiction therefore became uniquely instrumental in catalyzing the process of Chinese modernity which emerged and developed along the symbiotic interrelations between the private and the public the traditional and the modern and the real and the imaginary *Population Sciences*, 1978
