Public Priority Setting: Rules and Costs Peter B. Boorsma, Kees Aarts, Albert E. Steenge, 2012-12-06 At present we observe a decreasing role for the state in many areas where it used to be prominent. Amidst severe budgetary cuts the state and its organs are confronted with ever louder calls for efficiency in public office value for money and public performance. Simultaneously we see in many democratic welfare states the rise of new institutional forms and social organizations responding to new public priorities. Phenomena like privatization and de regulation new forms of regulation and self regulation and the rise of special issue groups are an expression of this. This book seeks to provide order in some of today's issues and to offer analysis and explanation for selected topics. The book opens with contributions on the importance of concepts of present day institutional economics interpreting modern governmental behavior and organization. Subsequent chapters deal with new developments in various fields such as environmental management and conservation political legitimacy or the new roles for covenants. Audience: This volume will be of interest for scholars in the fields of public service government studies and adjacent branches of economics political science and law.

Ethics and Accountability in a Context of Governance and New Public Management Annie Hondeghe, European Group of Public Administration, 1998 Ethics and accountability have become important themes for modern government as in most of the countries there is a severe crisis of legitimacy. Increasingly there is a feeling that performance management alone will not solve this crisis. Citizens also expect from politicians and public servants ethical responsible conduct. As to the ethics however there is a problem. Governance and new public management have raised new problems which cannot be solved by referring to the traditional

bureaucratic ethics Devolution and decentralisation processes have enhanced the responsibility of public servants The increase of transparency and openness and the service orientation of public organisations have challenged the traditional values of discretion and equality before the rule The growing interaction between the public and the private sector have raised the question of integrity In light of these developments it is important to update the ethical system or reversibly the traditional values of the public service can question some actual evolutions in government Handbook of Philosophy of

Management Cristina Neesham,Markus Reihlen,Dennis Schoeneborn,2022-12-01 The Handbook of Philosophy of Management addresses the philosophical foundations of management in theory and practice It covers established branches of philosophy such as aesthetics epistemology moral philosophy political and social philosophy philosophy of education philosophy of practice and philosophy of science The Handbook s broad scope maps out the field and provides a forum where philosophy can be meaningfully applied to the study of management in all its forms The original peer reviewed research published here sheds new light on the complexities of management theory and practice beyond what hitherto has been possible with the sole application of the social sciences As philosophy provides a meta framework for moving beyond paradigm fragmentation within management research and education this allows researchers and practitioners to find harmony and discord in the perspectives revealed by a philosophical lens **The Institutional Economics of**

Market-Based Climate Policy E. Woerdman,2004-08-10 The objective of this book is to analyze the institutional barriers to implementing market based climate policy as well as to provide some opportunities to overcome them The approach is that of institutional economics with special emphasis on political transaction costs and path dependence Instead of rejecting the neoclassical approach this book uses it where fruitful and shows when and why it is necessary to employ a new or neo institutionalist approach The result is that equity is considered next to efficiency that the evolution and possible lock in of both formal and informal climate institutions are studied and that attention is paid to the politics and law of economic instruments for climate policy including some new empirical analyses The research topics of this book include the set up costs of a permit trading system the risk that credit trading becomes locked in the potential legal problem of grandfathering in terms of actional subsidies under WTO law or state aid under EC law and the changing attitudes of various European officials towards restricting the use of the Kyoto Mechanisms *Public Administration Reformation* Yogesh K.

Improving Governance Laurence E. Lynn Jr., Carolyn J. Heinrich, Carolyn J. Hill, 2001-04-05 Policymakers and public managers around the world have become preoccupied with the question of how their goals can be achieved in a way that rebuilds public confidence in government Yet because public policies and programs increasingly are being administered through a complicated web of jurisdictions agencies and public private partnerships evaluating their effectiveness is more difficult than in the past Though social scientists possess insightful theories and powerful methods for conducting empirical research on governance and public management their work is too often fragmented and irrelevant to the specific tasks faced by legislators administrators and managers Proposing a framework for research based on the premise that any particular governance arrangement is embedded in a wider social fiscal and political context Laurence E Lynn Jr Carolyn J Heinrich and Carolyn J Hill argue that theory based empirical research when well conceived and executed can be a primary source of fundamental durable knowledge about governance and policy management Focusing on complex human services such as public assistance child protection and public education they construct an integrative multilevel logic of governance that can help researchers increase the sophistication power and relevance of their work

BOOK JACKET **Journal of Economic Literature** ,1998 **Precision Oncology and Cancer Biomarkers** Anne Bremer, Roger Strand, 2022-03-29

This open access book reflects on matters of social and ethical concern raised in the daily practices of those working in and around precision oncology. Each chapter addresses the experiences, concerns and issues at stake for people who work in settings where precision oncology is practiced, enacted, imagined or discussed. It subsequently discusses and analyses bioethical dilemmas, scientific challenges and economic trade-offs, the need for new policies, further technological innovation, social work as well as phenomenological research. This volume takes a broad actor-centred perspective as whenever cancer is present, the range of actors with issues at stake appears almost unlimited. This perspective and approach opens up the possibility for further in-depth and diverse questions posed by the actors themselves, such as: How are cancer researchers navigating biological uncertainties? How do clinicians and policy makers address ethical dilemmas around prioritisation of care? What are the patients' experiences with and hopes for precision oncology? How do policy makers and entrepreneurs envisage precision oncology? These questions are of great interest to a broad audience including cancer researchers, oncologists, policy makers, medical ethicists and philosophers, social scientists, patients and health economists.

Strategic Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro, 2015-02-20. Strategic Management in Public Services Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management. The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations, especially when considering successive New Public Management reforms. This observation has important consequences for the requisite work practices, skills and knowledge bases of current public managers as they are increasingly being asked to act as strategic as well as operational managers. Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions. The impact of strategic management on the performance of public agencies is examined, and it is argued that the appropriate use of strategic management models depends on the politico-administrative and cultural contexts of the public services organization in question, concluding that there is no single best way to strategically lead public organisations. This is an advanced textbook aimed at the postgraduate level, particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management.
