Public Private Finances In The Late Middle Ages:

War, Politics and Finance in Late Medieval English Towns Christian Drummond Liddy, 2005 The strengthening of ties between crown and locality in the fourteenth century is epitomised by the relationships between York and Bristol then amongst the largest and wealthiest urban communities in England and the crown This book combines a detailed study of the individuals who ruled Bristol and York at the time with a close analysis of the texts which illustrate the relationship between the two cities and the king thus offering a new perspective on relations between town and crown in late medieval England Beginning with an analysis of the various demands financial political and commercial made upon the towns by the Hundred Years War the author argues that such pressures facilitated the development of a partnership in government between the crown and the two towns meaning that the elite inhabitants became increasingly important in national affairs The book goes on to explore in detail the nature of urban aspirations within the kingdom arguing that the royal charters granting the towns their coveted county status were crucial in binding their ruling elites into the apparatus of royal government and giving them a powerful voice in national politics

Bruges, Cradle of Capitalism, 1280-1390 James M. Murray, 2005-01-20 Teeming with merchants from all over Europe medieval Bruges provides an early model of a great capitalist city Bruges established a sophisticated money market and an elaborate network of agents and brokers Moreover it promoted co operation between merchants of various nations In this book James Murray explores how Bruges became the commercial capital of northern Europe in the late fourteenth century He argues that a combination of fortuitous changes such as the shift to sea borne

commerce and the extraordinary efforts of the city's population served to shape a great commercial centre. Areas explored include the political history of Bruges, its position as a node and network, the wool cloth and gold trade, and the role of women in the market. This book serves not only as a case study in medieval economic history but also as a social and cultural history of medieval Bruges.

Medieval Crime and Social Control Barbara Hanawalt, David Wallace, 1999. Crime is a matter of interpretation and never was this truer than in the Middle Ages when societies faced with new ideas and pressures were continually forced to rethink what a crime was and what was a crime. This collection undertakes a thorough exploration of shifting definitions of crime and changing attitudes toward social control in medieval Europe. These essays reveal how various forces in medieval society interacted and competed in interpreting and influencing mechanisms for social control. Drawing on a wide range of historical and literary sources, legal treatises, court cases, statutes, poems, romances, and comic tales, the contributors consider topics including fear of crime, rape and violence against women, revenge, and condemnations of crime. Learned dispute about crime and social control and legal and political struggles over hunting rights.

Fiscal Policy in Early Modern Europe Rodrigo da Costa Dominguez, 2019-09-02. This book will examine the gradual assembly and consolidation of Portuguese fiscal policy in the second half of the fifteenth century, providing a comparative analysis of the Portuguese State's finances and fiscal dynamics with other Western European monarchies. This book examines relevant aspects of the Portuguese Royal finances, particularly the different instruments employed to provide income and the rubrics involving all types of expenditure between the reigns of Afonso V and Manuel I at the dawn of the Modern Ages. The analysis of Portugal's case will also serve as a main conducting wire to a broader fiscal examination of other Latin-rooted Mediterranean and North Atlantic kingdoms. This book will be of interest to students and researchers of economic history, fiscal history, economic theory, and history of economic thought, as well as students of Medieval History, the history of the Western Europe, and the Iberian Peninsula.

States of Credit David Stasavage, 2011-07-05. *States of Credit* provides the first comprehensive look at the joint development of representative assemblies and public borrowing in Europe during the medieval and early modern eras. In this pioneering book, David Stasavage argues that unique advances in political representation allowed certain European states to gain early and advantageous access to credit, but the emergence of an active form of political representation itself depended on two underlying factors: compact geography and a strong mercantile presence. Stasavage shows that active representative assemblies were more likely to be sustained in geographically small polities. These assemblies, dominated by mercantile groups that lent to governments, were in turn more

likely to preserve access to credit Given these conditions smaller European city states such as Genoa and Cologne had an advantage over larger territorial states including France and Castile because mercantile elites structured political institutions in order to effectively monitor public credit While creditor oversight of public funds became an asset for city states in need of finance Stasavage suggests that the long run implications were more ambiguous City states with the best access to credit often had the most closed and oligarchic systems of representation hindering their ability to accept new economic innovations This eventually transformed certain city states from economic dynamos into rentier republics Exploring the links between representation and debt in medieval and early modern Europe States of Credit contributes to broad debates about state formation and Europe's economic rise Early Modern Debts Laura Kolb, George Oppitz-Trotman, 2020-11-30 Early Modern Debts 1550 1700 makes an important contribution to the history of debt and credit in Europe creating new transnational and interdisciplinary perspectives on problems of debt credit trust interest and investment in early modern societies The collection includes essays by leading international scholars and early career researchers in the fields of economic and social history legal history literary criticism and philosophy on such subjects as trust and belief risk institutional history colonialism personhood interiority rhetorical invention amicable language ethnicity and credit household economics service and the history of comedy Across the collection the book reveals debt's ubiquity in life and literature It considers debt's function as a tie between the individual and the larger group and the ways in which debts structured the home urban life legal systems and linguistic and literary forms *Handbook of Administrative History* Jos Raadschelders, 2017-07-05 Public administration is commonly assumed to be a young discipline rooted in law and political science with little history of its own Likewise teaching and scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future Although most administrative scientists would acknowledge that their field has a history their time horizon is limited to the recent past Raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived This history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions In seeking to go beyond the usual problem solving and future oriented studies of public administration this volume adds greatly to the cognitive richness of this field of research Indeed the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government Raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration The volume is appropriately called a handbook in view of its methodical listing of the literature on administrative history together with summaries of numerous authors principal theories The second chapter is an essay on sources in the field including an extended bibliography These parts of the book alone make it useful to

scholars in the field Raadschelders is helpful in other ways as well The third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history including the issue of perceiving stage

The Promised Lands Wim Blockmans, Walter Prevenier, 1999 They were in the words of one contemporary observer the Promised Lands In all of Europe only Northern Italy could rival the economic power and cultural wealth of the Low Countries in the later Middle Ages In *The Promised Lands* Wim Blockman

A Free Nation Deep in Debt James MacDonald, James Macdonald, 2006-05-22 For the greater part of recorded history the most successful and powerful states were autocracies yet now the world is increasingly dominated by democracies In A Free Nation Deep in Debt James Macdonald provides a novel answer for how and why this political transformation occurred The pressures of war finance led ancient states to store up treasure and treasure accumulation invariably favored autocratic states But when the art of public borrowing was developed by the city states of medieval Italy as a democratic alternative to the treasure chest the balance of power tipped From that point on the pressures of war favored states with the greatest public creditworthiness and the most creditworthy states were invariably those in which the people who provided the money also controlled the government Democracy had found a secret weapon and the era of the citizen creditor was born Macdonald unfolds this tale in a sweeping history that starts in biblical times passes via medieval Italy to the wars and revolutions of the seventeenth and eighteenth centuries and ends with the great bond drives that financed the two world wars

they were rewarded and monitored and the gain they may have sought It focuses on the situation in the Low Countries but in many respects it also describes the development of the provision of public services in most towns in early modern Western Europe The complex mixture of central and local private and public ecclesiastical and secular individual and corporate initiatives characterized to a greater or lesser extent urban communities everywhere in Western Europe Above all early modern towns were civil societies in which community services such as health care poor relief and public security were largely shaped and formed by conceptions of citizenship and collective interest
