Public Speaking Clella Iles Jaffe, 1995 This text teaches public speaking skills in the context of cultural influences and resources. The author addresses the ways in which culture shapes forms of appropriate public speaking as well as how public speaking affects the values, attitudes and beliefs that shape cultural spheres of influence.

**Speaking Code** Geoff Cox, Alex McLean, 2012-11-16 The aesthetic and political implications of working with code as procedure, expression and action. *Speaking Code* begins by invoking the Hello World convention used by programmers when learning a new language, helping to establish the interplay of text and code that runs through the book. Interweaving the voice of critical writing from the humanities with the tradition of computing and software development in *Speaking Code*, Geoff Cox formulates an argument that aims to undermine the distinctions between criticism and practice and to emphasize the aesthetic and political implications of software studies. Not reducible to its functional aspects, program code mirrors the instability inherent in the relationship of speech to language; it is only interpretable in the context of its distribution and network of operations. Code is understood as both script and performance. Cox argues and is in this sense like spoken language always ready for action. *Speaking Code* examines the expressive and performative aspects of programming alternatives to mainstream development from performances of the live coding scene to the organizational forms of peer production, the democratic promise of social media and their actual role in suppressing political expression and the market's emptying out of possibilities for free expression in the public realm. Cox defends language against its invasion by economics, arguing that speech continues to underscore the human condition, however paradoxical this may seem in an era of pervasive computing.

Reflections in Communication Alusine M. Kanu, 2008-12-29 *Reflections in Communication* is a response and guide to the need for productive and effective communication and is designed for readers who have had little or no formal instruction in the field of speech communication. Dealing with cultural, critical and contextual issues, the text provides a comprehensive coverage. With an outstanding collection of chapters to develop knowledge and skills, this book uses an array of resources for communicating effectively in democratic societies. An added emphasis is the utilization of interdisciplinary approaches in dealing with principles, concepts, activities and theories of communication with research evidence. Based on the author's background as a communication generalist, this perceptive volume has broken ground because it applies communication study to a wide variety of situations such as self-concept, perception, listening, interpersonal interviewing, cultural, small group, speaking to inform and persuade and addressing freedom and responsibility issues in democratic societies.
