The Politics of the Earth John S. Dryzek, 2013 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues. He analyses the main discourses from the last 30 years and those likely to be influential in future.

Mainstreaming versus Alienation Peter Scholten, 2020-05-19 This book explores the role of complexity in the governance of migration and diversity. Current policy processes often fail to adequately capture complexity, favouring quick fix approaches to regulation and integration that result in various forms of alienation: problem alienation, institutional alienation, political alienation, and social alienation. Scholten draws on literature from gender and environmental governance to develop a mainstreaming approach that reframes migration as a contingent and emergent process made up of complex actor networks rather than a one size fits all policy model. By ensuring actors understand and respond to complexity, migration research can contribute to reflexivity in policy processes, help to promote mainstreaming and prevent alienation. The result will be of interest to students and scholars of migration and governance studies with a focus on policymaking and integration.

Public Administration Marc Holzer, Richard W. Schweser, 2014-12-18 Marc Holzer and Richard Schweser have written a fresh and highly engaging textbook for the introductory course in Public Administration. Their coverage is both comprehensive and cutting edge, not just including all the basic topics: OT budgeting, HRM, but also reflecting new realities in public administration: Innovations in e-government, The importance of new technology, Changes in intergovernmental relations, especially the emphasis on inter-local and shared regional resources, Public performance and accountability initiatives. Public Administration has been crafted with student appeal in mind. Each of the book's 14 chapters is generously and colorfully illustrated with cartoons, quotes, and artwork, all reinforcing the book's theme that the field of PA is rooted in the cultural and political world. Each chapter is also supported with a listing of key terms, exercises, and additional resources.

The Deliberative Practitioner John Forester, 1999 Citizen participation in such complex issues as the quality of the environment, neighborhood housing, urban design, and economic development often brings with it suspicion of government, anger between stakeholders, and power plays by many as well as appeals to rational argument. Deliberative planning practice in these contexts takes political vision and pragmatic skill. Working from the accounts of practitioners in urban and rural settings, North and South, John Forester shows how skillful deliberative practices can facilitate practical and timely participatory planning processes. In so doing, he provides a window onto the wider world of democratic governance, participation, and practical decision making. Integrating interpretation and theoretical insight with diverse accounts of practice, Forester draws on political science, law, philosophy, literature, and planning to explore the challenges and possibilities of deliberative practice.
