Envisioning a future without food waste and food poverty Leire Escajedo San-Epifanio, Mertxe De Renobales Scheifler, 2023-08-07 Different factors have contributed to what is known as the Contemporary Food Paradox To express this more graphically let us say that more than a third of the food in the world is wasted while almost 800 million people suffer extreme malnutrition Now the Millennium Goals deadline expired we must set the targets for the Sustainable Development Goals for the next decades Many national and international organizations point out the imperative need to give an adequate reply to this paradox Food waste has important economic and environmental implications and in addition there is an undeniable ethical and social justice aspect Beyond the figures of hunger and malnutrition mothers the unweaned and small children die prematurely and young people experience a deficient physical and mental development All these people members of our human family oblige us to recognize their inherent dignity as human beings and their equal and inalienable rights In this work academics from fifteen countries and different disciplines discuss proposals and strategies in order to respond to the desire for a world without waste or food poverty

Implementing European Union Public Policy Roger Levy, 2000-01-01 An analysis of EU programme management in all of the main spending areas over a 20 year period After setting out the management framework in each area the author examines audit evidence to

build up a comprehensive performance profile Setting Standards for Communication and Governance Lawrence J. M. Haas, Leonardo Mazzei, Leonardo Mazzei de Grazia, Donal O'Leary, 2007-01-01 This title outlines a number of practical initiatives to strengthen the role of development communication in infrastructure projects The authors aim to facilitate better quality projects and to build consensus on the type of governance reforms needed to fight corruption drawing on the experience of development agencies like the World Bank and Transparency International It starts by characterizing corruption vulnerabilities in infrastructure and proceeds to illustrate where communication has added value on a number of recent projects both in regard to making the projects more sustainable and by incorporating anti corruption measures into the project preparation and implementation It draws on examples of mainly World Bank supported projects from the road transport power and water sectors in different governance contexts Five standard setting initiatives are then outlined which focus on promoting best practice to better integrate development communication into the project cycles of World Bank supported infrastructure projects *The SAGE Encyclopedia of Economics and Society* Frederick F. Wherry, Juliet B. Schor, Consulting Editor, 2015-09-01 Economics is the nexus and engine that runs society affecting societal well being raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world From a household budget to international trade economics ranges from the micro to the macro level It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia which will explicitly approach economics through varied disciplinary lenses Although there are encyclopedias of covering economics especially classic economic theory and history the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world contemporary issues and society Features 4 volumes with approximately 800 signed articles ranging from 1 000 to 5 000 words each are presented in a choice of print or electronic editions Organized A to Z with a thematic Reader s Guide in the front matter groups related entries Articles conclude with References Future Readings to guide students to the next step on their research journeys Cross references between and among articles combine with a thorough Index and the Reader s Guide to enhance search and browse in the electronic version Pedagogical elements include a Chronology of Economics and Society Resource Guide and Glossary This academic multi author reference work will serve as a general non technical resource for students and researchers within social science programs who seek to better understand economics through a contemporary lens **Monitoring Fundamental Rights in the EU** Philip Alston, Olivier De Schutter, 2005-02 Coherent laws enforced by a central authority are part of the reason why human rights protection works at the national level in Europe But when it comes to the EU these dimensions are lacking The present system for protecting fundamental rights emerged on an ad hoc basis with measures being improvised to respond to particular problems In the next couple of years however this situation is likely to change very significantly The proposed European Constitution

incorporates the EU Charter of Fundamental Rights and a specialized EU Fundamental Rights Agency is likely to be established. As a result, the situation of the EU will more closely resemble that of its Member States. Fundamental rights will occupy a central role and coherent and systematic arrangements will be in place to protect rights using both judicial and non-judicial means. The Fundamental Rights Agency, in particular, has immense potential to ensure effective monitoring of fundamental rights in the EU and to ensure a unified strategy for their promotion in EU law and policy. This volume is the first to critically examine the proposals put forward by the European Commission in October 2004 on the creation of the EU Fundamental Rights Agency. Leading scholars in the field of European and international human rights law analyse the potential significance of this innovative Agency and seek to locate it in relation to various other human rights mechanisms both in the EU's constitutional structure and within Member States. They review the tasks which the Agency could be called upon to perform and make proposals as to how it can function most effectively. The relationship of EU law to the international law of human rights, emerging from both the United Nations and the Council of Europe, is examined. The authors also address the challenge of ensuring improved coherence between EU law and the other human rights obligations undertaken by the Member States. Taken together, these contributions address urgent questions facing the EU at a time when the central unifying function of fundamental rights has been recognized but the way forward remains largely uncharted.
