

# PUBLIC REVENUE WITHOUT TAXATION

*"Taxation is a primal cause of both inflation and unemployment. Regardless of this, the freely elected governments of contemporary trading economies - with the acquiescence of their electorates - persist in raising the major part, if not all, of their revenues by means of taxation. The immediate cause of such action by governments, and for the acquiescence of their electorates, is ignorance of any acceptable alternative method of raising sufficient public revenue."*

## **Public Revenue Without Taxation:**

**Public Revenue Without Taxation** Ronald Burgess, 1993-01-01 Gordon Brown was a past master at sneaking in new taxes by stealth but his efforts as Chancellor and then Prime Minister were merely the latest in a long line of party leaders desperate to extract more money from reluctant taxpayers This book challenges the need for government to resort to such underhand practices which undermine the economy killing the goose which lays the golden eggs and the integrity of the political process The author argues that not only does taxation flout the principle of private property but it is a primal cause of both inflation and unemployment Regardless of this the freely elected governments of contemporary trading economies with the acquiescence of their electorates persist in raising the major part if not all of their revenues by means of taxation The immediate cause of such action by governments is ignorance of any acceptable alternative method of raising sufficient public revenue Burgess shows how the development of Keynes general theory of employment leads to the conclusion that an open trading economy is likely to be most competitive and therefore most prosperous only when taxation is abolished but government must be funded How can this be done without taxation To provide an answer he refines Alfred Marshall's distinction between the public and private value of property to reveal an alternative peculiarly public source of revenue Unlike a tax defined by a former Labour Chancellor Hugh Dalton as a compulsory contribution imposed by a public authority irrespective of the exact amount of service rendered to the taxpayer in return the public value identified by Marshall would deliver an exact equivalence between the benefits enjoyed and the amount paid On the basis of this widely accepted definition therefore it is not a tax but the price for services rendered like any other transaction the price fixed by the market The author shows how reform may be introduced with a minimum of disruption so that politicians with an eye to re election can achieve measurable results during the lifetime of a parliament *Governmental Finances in the United States*, 1957

**Governmental Finances in the United States** United States. Bureau of the Census, 1947 **The Political Economy of Underdevelopment in Sub-Saharan Africa** Christopher E.S. Warburton, 2024-10-14 This book provides a unique combination of history politics and economics to rationalize the progression of underdevelopment in Sierra Leone and the challenges of economic growth and development confronting some Sub Saharan African countries It concisely presents the internal frictions that are most responsible for the underdevelopment of Sierra Leonean since 1961 while also benchmarking the performance of the country with some countries in the subregion Europe the US Latin America and Asia It highlights the external threats that are highly capable of stifling the economic growth and sustainable development of the country including sovereign debt the paucity of human capital the use of natural resources and external shocks The central concepts of analysis include the premise for underdevelopment contexts for business strategies and rivalry in an underdeveloped economy economic growth productivity sustainable development international trade and threats to macroeconomic stability in the form of volatile commodity prices loss of competitiveness inaccessible foreign markets deficient healthcare infrastructure the

cost of unsustainable sovereign debt and the viability of long term investments The book has been intentionally developed for all those who are strongly interested in the political economy of Sub Saharan Africa with particular emphasis on Sierra Leone empirical work on economic growth and development academic instruction on international political economy international organizations and policymakers      **Governmental Finances in ...** ,1969      **Public Finance** Richard W.

Tresch,2014-11-10 Public Finance remains the premier textbook on the normative theory of government policy with the third edition propelling into the twenty first century its examination of what government ought to be doing instead of what it is doing The welfare aspects of public economics receive extensively renewed examination in this third edition With four new chapters and other significant revisions it presents detailed and comprehensive coverage of theoretical literature empirical work environmental issues social insurance behavioral economics and international tax issues With increased emphasis on the European Union it is rigid enough for use by PhDs while being accessible to students less well trained in math Moves skillfully from explaining normative theory to applying it in mathematically compact and precise terms Adds new chapters on social insurance medical care social security pensions behavioral public economics and international public finance Includes new pedagogical supplements including end of chapter questions and answers Emphasizes European examples      **Revenue Statistics 2023 Tax Revenue Buoyancy in OECD Countries** OECD,2023-12-06 This annual publication gives a conceptual framework to define which government receipts should be regarded as taxes It presents a unique set of detailed and internationally comparable tax data in a common format for all OECD countries from 1965 onwards This year s edition includes a special feature on tax revenue buoyancy in OECD countries      **The History of the Public Revenue of the British Empire** John Sinclair,1804      *Fiscal Resilience Building: Insights from a New Tax Revenue Diversification Index*

Rasmané Ouedraogo,Rene Tapsoba,Moussé Sow,Ali Compaoré,2020-06-12 Does the reliance on diversified tax structure enhance resilience to fiscal risks This paper gives an answer to this question by proposing a new cross country tax revenue diversification index RDI The RDI builds on the Theil index and unlike the few existing tax diversification indices which are constructed only at the state level for the US is computed at the national level covering a broad panel of 127 countries over the period 2000 15 We find suggestive evidence that tax revenue diversification reduces tax revenue volatility thus bringing to the data long held views about the prominence of tax revenue diversification for fiscal resilience strengthening While exploring the drivers of the RDI we find that tax revenue diversification is not just a reflection of economic diversification but also an outcome of macroeconomic political and institutional factors Interestingly a non monotone relationship is also at play between the RDI and economic development with countries portfolio of tax sources getting more diversified as their economy develops until a tipping point where richer countries start finding it harder to diversify further their tax revenue sources

*A Moment of Equality for Latin America?* Prof Dr Barbara Fritz,Professor Lena Lavinas,2015-10-28 Unlike other regions around the world several Latin American countries have managed to reduce income inequality over the last decade Higher

growth rates and growing employment but also innovative wage policies and social programs have contributed to reducing poverty and narrow income disparities Yet despite this progress nation states in the region demonstrate little capacity to substantially change their patterns of deeply rooted inequalities Focusing on the limits and challenges of redistributive policies in Latin America this volume synthesizes and updates the discussion of inequality in the region introducing the perspective of global and transnational interdependencies The book explores the extent to which redistributive policies have been interlinked with the provision and quality of public goods as well as with structural changes of the productive sector Inspired by structuralist and neostructuralist thinking of Latin American economists such as Raúl Prebisch and Celso Furtado authors question the redistributive impact of the interplay of recent macroeconomic fiscal and social policies particularly under left and center left administrations committed to greater equality Bringing together experts in social fiscal and macroeconomic policies to investigate the interdependent and global character of inequalities this book will appeal to scholars of sociology economics development and politics with interests in Latin America inequality and public policy

Federal-State-local Finances United States. Advisory Commission on Intergovernmental Relations,1972      *Growth and Variability in State Tax Revenue* Randall G. Holcombe,Russell S. Sobel,1997-10-28 During recessions state government fiscal crises are widespread as states find their revenues inadequate to meet their expenditure demands This volume shows that

state fiscal crises have only one significant cause revenue downturns associated with recessions Other analysts have argued that fiscal crises are the result of an interaction of many complex causes including inadequate tax bases increasing expenditure demands and limits placed on state governments by voters This analysis examines these other factors and shows that while they present significant challenges to state policymakers they are not the cause of fiscal crises The book presents an improved methodology for measuring cyclical variability of revenues and uses this methodology to show that there is no way to restructure state tax systems in order to appreciably reduce the fiscal stress associated with recessions Fiscal stress can be lessened by setting aside revenues during prosperous years in a rainy day fund but current rainy day funds are not large enough to eliminate the fiscal stress caused by recessions
