Van Dyke, 2015-11-12

It is little wonder that relationships between things and humans are front and center in the contemporary social sciences given the presence of technologies in every conceivable aspect of our lives From Bruno Latour to Ian Hodder anthropologists and archaeologists are embracing thing theory and the ontological turn In Practicing Materiality Ruth M Van Dyke cautions that as anthropologists turn toward animals and things they run the risk of turning away from people and intentional actions Practicing Materiality focuses on the practical job of applying materiality to anthropological investigations but with the firm retention of anthropocentrism The philosophical discussions that run through the nine chapters develop practical applications for material studies including Heideggerian phenomenology Gellian secondary agency object life histories and bundling Seven case studies are flanked by an introduction and a discussion chapter The case studies represent a wide range of archaeological and anthropological contexts from contemporary New York City and Turkey to fifteenth century Portugal the ancient southwest United States and the ancient Andes Authors in every chapter argue for the rejection of subject object

dualism regarding material things as actively involved in the negotiation of power within human social relationships  
Practicing Materiality demonstrates that it is possible to focus on the entangled lives of things without losing sight of their political and social implications     Anasazi America David E. Stuart, Susan B. Moczygemba-McKinsey, 2000-05 At the height of their power in the late eleventh century the Chaco Anasazi dominated a territory in the American Southwest larger than any European principality of the time A vast and powerful alliance of thousands of farming hamlets and nearly 100 spectacular towns integrated the region through economic and religious ties and the whole system was interconnected with hundreds of miles of roads It took these Anasazi farmers more than seven centuries to lay the agricultural organizational and technological groundwork for the creation of classic Chacoan civilization which lasted about 200 years only to collapse spectacularly in a mere 40 Why did such a great society collapse Who survived Why In this lively book anthropologist archaeologist David Stuart presents answers to these questions that offer useful lessons to modern societies His account of the rise and fall of the Chaco Anasazi brings to life the people known to us today as the architects of Chaco Canyon the spectacular national park in New Mexico that thousands of tourists visit every year     **Anthropological Studies Related to Health Problems of North American Indians** Robert S.
