Canizaro, 2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today **The Oxford Handbook of Southwest Archaeology** Barbara Mills, Severin Fowles, 2017-08-15 The American Southwest is one of the most important archaeological regions in the world with many of the best studied examples of hunter gatherer and village based societies Research has been carried out in the region for well over a century and during this time the Southwest has repeatedly stood at the forefront of the development of new archaeological methods and theories Moreover research in the Southwest has long been a key site of collaboration between archaeologists ethnographers historians linguists biological anthropologists and indigenous intellectuals This volume marks the most ambitious effort to take stock of the empirical evidence theoretical orientations and historical reconstructions of the American Southwest Over seventy top

of raw earth materials for building construction emerged in the 1970s Solar Adobe examines this new wave of architectural experimentation taking place in the United States detailing how an ancient tradition became a point of convergence for issues of environmentalism architecture technology and Indigenous resistance Utilized for centuries by the Pueblo people of the American Southwest and by Spanish colonialists adobe construction found renewed interest as various groups contended with the troubled legacies of modern architecture and an increasingly urgent need for sustainable design practices In this period of critical experimentation design networks that included architects historians counterculture communities government weapons labs and Indigenous activists all looked to adobe as a means to address pressing environmental and political issues Albert Narath charts the unique capacities of adobe construction across a wide range of contexts consistently troubling simple distinctions between traditional and modern technologies high design and vernacular architecture Drawing insightful parallels between architecture environmentalism and movements for Indigenous sovereignty Solar Adobe stresses the importance of considering the history of the built environment in conjunction with architecture s larger impact on the natural world

for structuring and acting on consultations with affiliated communities      *Theoretical Perspectives in Environment-Behavior Research* Seymour Wapner, Jack Demick, C. Takiji Yamamoto, Hiroufmi Minami, 2012-12-06 Following upon the Handbook of Japan United States Environment Behavior Research published by Plenum in 1997 leading experts review the interrelationships among theory problem and method in environment behavior research The chapters focus on the philosophical and theoretical assumptions underlying current research and practice in the area and link those assumptions to specific substantive questions and methodologies      *On Frank Lloyd Wright's Concrete Adobe* Donald Leslie Johnson, 2016-12-05 During the years 1919 into 1925 Frank Lloyd Wright worked on four houses and a kindergarten located in metropolitan Los Angeles using concrete blocks as the main building material The construction system has been described by Wright and others as uniquely molded woven like a textile fabric and perceived as ground breaking truly modern unprecedented Many have attempted to uphold these claims while some thought the house designs borrowed from old exotic buildings For the first time this book brings together Wright's declarations the support of upholders and inferences in order to determine their accuracy and correctness or the possibility of feigned or fictional stories It examines technical developments of concrete blocks by Wright and others before his experiences in Los Angeles began in 1919 It also studies the manner of Wright's design process by an examination of relevant pictorial and textual documents A unique in depth and critical analysis of the houses is set within historical biographical and theoretical contexts Consequently the book explains the impact upon Wright of California contemporaries architects Irving Gill and Rudolph Schindler and their instrumentally profound role upon the course of modernism 1907 1923 In doing so it allows a full appreciation of Wright's Gill's and Schindler's buildings beyond their experiential qualities      *Hopi Dwellings* Catherine M. Cameron, 2015-09-01 The dramatic split of the Hopi community of Orayvi in 1906 had lasting consequences not only for the people of Third Mesa but also for the very buildings around which they centered their lives This book examines architectural and other effects of that split using architectural change as a framework with which to understand social and cultural processes at prehistoric Southwestern pueblos Catherine Cameron examines architectural change at Orayvi from 1871 to 1948 a period of great demographic and social upheaval Her study is unique in its use of historic photographs to document and understand abandonment processes and apply that knowledge to prehistoric sites Photos taken by tourists missionaries and early anthropologists during the late nineteenth century portray original structures while later photos show how Orayvi buildings changed over a period of almost eighty years Census data relating to house size and household configuration shed additional light on social change in the pueblo Examining change at Orayvi afforded an opportunity to study the architectural effects of an event that must have happened many times in the past the partial abandonment of a pueblo by tracing the effects of sudden population decline on puebloan architecture Cameron's work provides clues to how and why villages were abandoned and re established repeatedly in the prehistoric Southwest as it offers a unique window on the relationship between Pueblo houses and the

living people who occupied them      **Handbook of Japan-United States Environment-Behavior Research** Jack Demick, T. Takahashi, Seymour Wapner, C. Takiji Yamamoto, 2013-11-11 This volume is an outgrowth of research on the relations between human beings and their environments which has developed internationally This development is evident in environment behavior research studies conducted in countries other than the United States See Stokols and Altman 1987 for examples of such work in Australia Japan France Germany the Netherlands Sweden the United Kingdom the former Soviet Union and Latin and North America The international development of this research area is also evident in the establishment of professional organizations in different countries such as the Environment Behavior Design Research Association EDRA in the United States the Man Environment Research Association MERA in Japan the International Association for People Environment Studies IAPS in Great Britain and the People and Physical Environment Research Association PAPER in Australia This volume focuses on environment behavior research within Japan and the United States as well as cross cultural studies involving both countries As we note in detail in Chapter 1 the conference on which the work presented herein is based was preceded by three Japan United States conferences on environment behavior research the first of which took place in Tokyo in 1980 As currently conceived the present volume stands alone as a compendium of a significant proportion of cross cultural research on environment behavior relations in Japan and the United States that has been developing over the last 15 years As such we envision the volume as a basic interdisciplinary reference for anthropologists architects psychologists sociologists urban planners and environmental geographers      *History and Precedent in Environmental Design* Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful      *The Myth of Santa Fe* Chris Wilson, 1997 Debunks the great tourist myth and explains how the Santa Fe architectural and design style so popular with millions of visitors today was consciously created by Anglos in the early 20th century      *The Spanish*

*Redemption* Charles Montgomery, 2002-03-20 The Spanish Redemption contributes an extremely important chapter to the burgeoning literature on the construction of whiteness in the United States to our understanding of the shifting and complicated relationship between ethnicity and class and a concrete example of how culture can be used to shape political and economic identities With considerable dexterity and authority with nuance and subtly with newly utilized archival evidence and with a glorious narrative flair Montgomery fastidiously describes the racial politics that were played out through the cultural production of an imagined Spanish past Ram n Guti rrez author of *When Jesus Came the Corn Mothers Went Away Marriage Sexuality and Power in New Mexico 1500 1846* and co editor of *Contested Eden California Before the Gold Rush* Between the two world wars villagers in northern New Mexico became Spanish Americans rather than Mexican Americans and artists writers and boosters celebrated their previously despised arts crafts architecture foods and folkways With probing intelligence and graceful limpid prose Montgomery tells the remarkable story of this shift in regional identity and its disturbing and enduring consequences The quaint Hispano villages of northern New Mexico will never look the same David J Weber author of *The Spanish Frontier in North America* *The Role of Place Identity in the Perception, Understanding, and Design of Built Environments* Hernan Casakin, Fátima Bernardo, 2012 In an era of globalization where the progressive deterioration of local values is a dominating characteristic identity is seen as a fundamental need that encompasses all aspects of human life One of these identities relates to place and the physical en *Personal Adornment and the Construction of Identity* Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation *Personal Adornment and the Construction of Identity* seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played
