British Transport Police Malcolm Clegg,2022-12-29 This book traces the history of the British Transport Police the National Police Force responsible for

policing the railways of England Scotland and Wales The roots of the Force go back almost 200 years starting with the development of the railways during the Nineteenth Century Hundreds of railway companies were founded and although mergers and amalgamations took place by the end of the century well over 100 railway companies were operating most of which employed railway policemen The first railway policemen were recruited to work on the Stockton and Darlington Railway in 1826 Other railway companies quickly followed and by the 1850s railway policemen with their smart uniforms and top hats were a common sight on Britain's railways During the Twentieth Century railway companies continued to merge before being nationalized in 1948 The following year the British Transport Commission BTC was created to oversee not only the newly nationalized railway network but also the nation's docks shipping inland waterways road transport road haulage and other companies Also in 1949 the British Transport Commission Police BTC Police was created to take over the policing of these newly nationalized institutions All the former railway dock and canal police forces were then absorbed into the new BTC Police Force The BTC was abolished in 1962 having incurred serious financial losses The BTC Police was renamed the British Transport Police in 1963 and has continued to operate ever since It no longer polices the docks harbors and canals for reasons outlined in this book

Modelling the East Coast Main Line in the British Railways Era Tony Wright,2017-06-30 Modelling the East Coast Main Line in the British Railways Era follows the construction of an East Coast Main Line layout in 00 gauge based on the Little Bytham prototype Little Bytham

nestled in rural Lincolnshire is the station nearest to where the fastest steam exploits in the country were achieved. Nearby the Flying Scotsman became the first steam locomotive to reach 100 miles per hour. Papyrus broke the world speed record for a non-streamlined locomotive and Mallard set the current world speed record for a steam locomotive. This practical guide escorts the reader through all aspects of constructing an East Coast Main Line layout and topics include baseboard construction, track laying and ballasting, wiring and making signals, modelling scenery, buildings, locomotives, carriages and wagons, and how to plan an operation sequence.

A Historical Dictionary of Railways in the British Isles David Wragg, 2009-04-21. Railways played a key role in Britain's social, economic and industrial history. These companies have long since gone but all over the country relics remain to remind us of that pioneering age. David Wragg's *Historical Dictionary of Railways in the British Isles* is a comprehensive single volume reference guide to the old railway companies and their heritage. He provides brief histories of the companies and their many-sided activities and he gives biographies of the men who created the rail network. He covers what is now the Irish Republic and Northern Ireland as well as the Channel Islands and the Isle of Man. His book is essential reading and reference for enthusiasts of every region and period of railway history.

Railway Carriages Tim Bryan, 2019-05-30. Evolving from the horse-drawn stage coaches that they soon eclipsed, railway carriages steadily grew in sophistication so that by the end of the nineteenth century the railway passenger travelled in comfortable rolling stock of a design familiar to many until the 1960s. While modern trains look different from those built more than a century ago, even today the facilities are not so dissimilar from those enjoyed by our Victorian ancestors. This book describes the development of the railway carriage from those early days to the present, highlighting some of the key developments in the history, design and construction of carriages. It also looks at the innovations that made life easier for the passenger, such as the introduction of heating, lavatories and restaurant and buffet facilities, as well as the differences in comfort between the various classes of traveller.

British Railways in the 1950s and '60s Greg Morse, 2012-09-20. As Britain moved from austerity to prosperity in the 1950s and 1960s, it became clear that British Railways needed to modernise its equipment and rationalise its network if it was to hold its own in the face of growing competition from road and air transport. After attempting to maintain pre-war networks and technology in the 1950s, a reversal of policy in the 1960s brought line closures, new liveries and the last breath of steam as Dr Beeching and his successors strove to break even and build a new business from the old. From Britannia to the Blue Pullman, Evening Star to Inter City, Greg Morse takes us through this turbulent twenty-year period which started with drab prospects and ended with BR poised to launch the fastest diesel-powered train in the world.
