The book is divided into four sections that deal with morphology and morphometry, respiratory physiology, biochemistry and pulmonary defense. A special index lists and cross indexes all comparative data included in the text, which provides readers with easy access to a broad spectrum of pulmonary data for a number of different species. Over 50 internationally respected authors have contributed to this cutting edge scientific study designed for all scientists concerned with the pulmonary system, including research scientists in medicine, veterinary medicine, zoology and toxicology.

**Respiratory Infections** Lionel Mandell, Mark Woodhead, Santiago Ewig, Antoni Torres, 2006-10-27. The aim of the volume is to provide an authoritative and international treatise bringing together current knowledge in the field of respiratory infection. The book will be organised by presentation rather than causative organism, a differentiating feature from the existing competition and will be divided into four parts: General Issues, Community acquired Infections, Nosocomial Infections and Respiratory Infection in Immunocompromised Patients. Each chapter will conclude with a summary highlighting practical take home messages regarding patient management for the reader. It will be highly illustrated, including colour plates where appropriate.
