REPORT SUMMARY

After a sharp decline in 2009, global packaging sales recovered in 2010 to just short of the previous year's levels, at \$671 billion. The market is projected to grow by around 4% in 2011, to reach \$696 billion, driven mainly by increasing demand for packaging in emerging and transitional economies. Going forward, Pira predicts growth of 3% per annum, with sales set to exceed \$800 billion by 2016. *The Future of Global Packaging* provides market sizes and forecasts broken down by packaging product, end-use sector and geographic market, in a comprehensive overview of the status of the packaging industry in 50 countries globally.

Bad Harvest Nigel Dudley,Jean-Paul Jeanrenaud,Francis Sullivan,2014-06-03 The world s forests are disappearing at an alarming rate and with disastrous consequences Demand for wood and paper products ranks high amongst the causes of deforestation and forest degradation and is now the major cause of loss in those forests richest in wildlife There is a great deal to be done to improve the timber industry before our forests are safely and sustainably managed

Bad Harvest presents an incisive account of the role that the timber trade has played in the loss and degradation of forests around the world. It examines the environmental consequences of the trade on boreal, temperate and tropical regions and its impacts for local people working and living in the forests. It also looks at the changing nature of the trade and assesses current national and international initiatives to address the impacts of deforestation. Finally, the authors show how things could be improved in the future by presenting a new strategy for sustainable forest management. Based on 15 years of extensive research, particularly work carried out by the World Wide Fund for Nature, *Bad Harvest* is essential reading on the subject not only for environmentalists but also for those in the timber trade seeking to improve the management and reputation of their product. *Tappi Journal*, 1996 **Whitaker's Books in Print**, 1998 Economic and Environmental Impacts of Waste Paper Trade and Recycling in India International Institute for Environment & Development, 1996

Computational Models in the Economics of Environment and Development A.K. Duraiappah, 2012-12-06

Computational Models in the Economics of Environment and Development provides a step by step guide in designing, developing and solving non linear environment development models. It accomplishes this by focusing on applied models using real examples as case studies. Additionally, it gives examples of developing policy interventions based on quantitative model results. Finally, it uses a simple computer program GAMS to develop and solve models. This book is targeted towards university lecturers and students in economic modeling and sustainable development but is also of particular interest to researchers at sustainable development research institutes and policy makers at international sustainable development policy institutions such as the World Bank, UNDP and UNEP. *Guide to Business Information on Russia, the NIS and the Baltic States* Tania Kohn, 2003-09-02.
