Paper and Composites from Agro-Based Resources Roger M. Rowell, Judith Rowell, 1996-10-15 Sustainable development is an important concept underlying many of today's renewable resource policies. Agro-based resources such as wood make up a significant portion of modern renewable resources. While probably the most familiar example, wood is only one type of agromass in the vast world of photosynthetic resources. Paper and Composites from Agro Based Resources explores the great number of options available for producing paper and composites. Using sound ecosystem management principles, the book discusses strategies for obtaining fiber from plant-based resources, including agricultural crops and residues, grasses, and recycled agro-based resources, in addition to wood. *Business Service Bulletin*, 1955
