(pathogens that can be transmitted through the air)

# Pulse Airborne Disease

**M Planty**

## **Pulse Airborne Disease:**

**Disease Of Cereals And Pulses** Raghvendra Singh, Kuldeep Singh, Vishal Singh, 2019-10-30 Symptoms are produced on almost all aerial parts of the wheat plant but are most common on stem leaf sheaths and upper and lower leaf surfaces Uredial pustules or sori are oval to spindle shaped and dark reddish brown rust in color They erupt through the epidermis of the host and are surrounded by tattered host tissue The pustules are dusty in appearance due to the vast number of spores produced Spores are readily released when touched

**Management of Fungal Pathogens in Pulses** Bhim Pratap Singh, Garima Singh, Krishna Kumar, S. Chandra Nayak, N. Srinivasa, 2020-02-03 Pulses have played a major role in human diet and are considered a rich source of proteins But the major constraints in achieving the yield of pulses are the occurrences of various diseases and pests Hence there is a need to understand major fungal pathogens and their management strategies for sustainable agriculture The major pulse crops in India and other Asian countries are bengal gram pigeon pea black gram green gram lentil and peas which are attacked by several pathogens that cause considerable crop damage Bengal gram is affected mainly by wilt *Fusarium oxysporum* f sp *ciceri* blight *Mycosphaerella pinodes* and rust *Uromyces ciceris arietini* The main diseases of pigeon pea are wilt *Fusarium oxysporum* and *Phytophthora stem blight* *Phytophthora drechsleri* f sp *cajani* Powdery mildew *Erysiphe polygoni* and rust *Uromyces vicia fabae* are the most important diseases affecting the production of pea This volume offers details like symptoms distribution pathogens associated predisposing factors and epidemiology sources of resistance and holistic management of diseases with particular reference to those of economic importance Several minor diseases of lentil green gram and of black gram are discussed with their detailed and updated information This volume provides pooled information regarding the management of major fungal phytopathogens affecting pulses

*Aerobiological Engineering Handbook : Airborne Disease and Control Technologies* Wladyslaw Kowalski, 2005-12-13 Solve any building air quality problem A complete reference for the design of air filtration systems and HVAC systems used in homes schools hospitals laboratories or animal facilities this book offers complete descriptions of each of the major technologies currently used for air disinfection Each subject chemical or microbial is treated in sufficient detail to allow the design of these components to solve specific building air quality problems Design solutions for control of gases and odors Recommended technologies and methods to combat biological terrorist weapons in HVAC systems Diagnosis of air quality problems Complete airborne pathogen database for the identification of infection risk

**Breeding Climate Resilient and Future Ready Pulse Crops** Manish K. Pandey, M. G. Mallikarjuna, H. C. Lohithaswa, Muraleedhar S. Aski, Sanjeev Gupta, 2025-02-20 This edited volume covers the application of modern breeding tools for developing climate smart pulse crop cultivars The primary focus is on utilizing available genomic resources and next generation breeding technologies such as genome wide association mapping genomic selection genome editing and accelerated breeding pipelines for the rapid development of stress resilient systems specific pulse cultivars Pulses contribute

to 10% of global daily protein intake and 5% of energy Their ability to fix atmospheric nitrogen and serve as an alternative protein source to meat makes them crucial in combating global warming With the global population expected to reach 9.8 billion by 2050 pulses production needs to increase by at least 70% to meet demand However pulses production is facing growing biotic and abiotic challenges exacerbated by climate change Thus developing next generation climate smart cultivars is essential to ensure food and nutritional security Recent efforts by global and national breeding communities have led to the discovery of new genomic resources shifting breeding from phenotype based to genome based approaches These advances integrate rapid generation advancement pipelines with genomic assisted breeding trait mapping and genome editing tools This book is valuable for agricultural scientists scholars and graduate students involved in pulse crop improvement It also serves as a reference for policymakers and research grant managers in formulating pulse research programs

**Outdoor Emergency Care: A Patroller's Guide to Medical Care** National Ski Patrol, 2020-05-07 Developed in partnership with the National Ski Patrol Outdoor Emergency Care A Patroller's Guide to Medical Care Sixth Edition is designed to prepare first responders to handle any medical situation in the outdoor environment during all seasons The Sixth Edition features A straightforward consistent patient assessment process The patient assessment process is presented in the same way patients are assessed in the health care system Flowcharts are provided throughout the Patient Assessment chapter to keep the reader focused on each step of the process Up to date content As you read through each chapter you will find new information that is current with present prehospital patient care Subject matter that meets and in many cases exceeds the National Emergency Medical Responder criteria Information unique for ski and bicycle patrollers including extrication is included This material is presented in a format that combines the disciplines of urban EMS and wilderness medical rescue Continuous case studies A continuous case study is included in each chapter to encourage critical thinking and application of the information as readers progress through the chapter End of chapter review questions The review questions included at the end of each chapter allow students to evaluate the knowledge they have gained while reading the chapter Focus on learning objectives Specific objectives listed at the beginning of each chapter tell students at the outset what they are expected to learn as they move through the chapter

*Pulse* Primedia, 1998-03-01 Airborne communicable diseases are those that can be spread from person to person by exposure to droplets produced by expiratory efforts This program focuses on the diseases such as rubella and mumps
