formation of a new government originally reduced the nation's debt but as debt was critical to this government's survival it resurfaced to be beaten back once more Wright then reveals how political leaders began accumulating massive new debts to ensure their popularity setting the financial stage for decades to come Wright traces critical evolutionary developments from Alexander Hamilton's creation of the nation's first modern capital market to the use of national bonds to further financial goals to the drafting of state constitutions that created non predatory governments He shows how by the end of Andrew Jackson's administration America's financial system was contributing to national growth while at the same time new national and state debts were amassing sealing the fate for future generations
