**Proof, Evidence and Hate Crime** Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

Hate Crime Statutes Frank S. Pezzella, 2016-07-28 This Brief provides a clearly outlined and accessible overview of the challenges in creating and enforcing hate crime legislation in the United States As the author explains while it is generally not controversial that hate crime behavior should be stopped the question of how to do so effectively is complex This volume begins with an introduction about defining hate crimes and the history of hate crimes and hate crime legislation in the United States The author shows arguments in favor of hate crime statutes for example hate crimes reach beyond their victims to members of the victims protected group and cohesion of society at large and should therefore carry higher penalties The author also shows arguments against hate crime statutes for example that they sometimes contain enhanced penalties for certain specially protected groups and not others and have a high potential for ambiguity and uneven enforcement From a law enforcement perspective the author explores the practical challenges in enforcing these statutes and solutions to address them Investigative techniques and resources vary significantly across police departments as does training to identify and distinguish hate crimes from ordinary crimes There is high potential for law enforcement and prosecutors' personal biases to effect the classification of crimes as hate crimes Law enforcement organizations are constantly faced with the dilemma of what and how to enforce legislation This brief will be relevant for researchers in criminology and criminal justice policy makers involved in hate crime legislation social justice and police community relations as well as related fields such as
