An Inventory of the Historical Monuments in Essex Royal Commission on Historical Monuments (England), 1921      **The Curious Case of Lady Purbeck - A Scandal of the XVIIth Century** Thomas Longueville, 2018-11-23 The Curious Case of Lady Purbeck is a 1909 work by Thomas Longueville Within it Longueville examines a famous legal scandal from the sixteenth century involving one Lady Purbeck Dealing in detail with a fascinating and mysterious case this volume is highly recommended for those with an interest in notable historical cases of criminality and scandal as well as those with an interest in 17th English society in general Many vintage books such as this are increasingly scarce and expensive It is with this in mind that we are republishing this classic volume now in an affordable modern high quality edition for the enjoyment of literature lovers now and for years to come      **English Medieval Sculpture** Arthur Gardner, 2011-08-11 First published in 1951 this volume provides a historical study of English sculpture during the medieval period      Of Armor and Men in Medieval England RachelAnn Dressler, 2017-07-05 Despite the profusion of knightly effigies created between c 1240 and c 1330 for tombs throughout the British Isles these commemorative figures are relatively unknown to art historians and medievalists Until now their rich visual impact and significance has been relatively unexplored by scholars In this study Rachel Dressler examines this category of sculpture illustrating how English military figures employ a visual language of pose costume and attributes to construct a masculine ideal that privileges fighting prowess elite status and sexual virility Like military figures on the Continent English effigies represent knights wearing chain mail and surcoats and bearing shields and swords unique to the British examples however is the display of an aggressive sword handling pose and dynamically crossed legs Outwardly hyper masculine the carved figures partake in artistic subterfuge the lives of those memorialized did not always match proffered images testifying to the changing function of the knight in England during the thirteenth and early fourteenth centuries This study traces the development of English military figures and analyzes in detail three fourteenth century examples those commemorating Robert I De Vere in Hatfield Broad Oak Essex Richard Gyvernay at

Limington Somerset and Henry Allard in Winchelsea Sussex Similar in appearance these three sculptures represent persons of distinctly different social levels De Vere belonged to the highest aristocratic rank where Gyvernay was a lesser county knight and Allard was from a merchant family raising questions about his knightly standing Ultimately Dressler's analysis of English knight effigies demonstrates that the masculine warrior during the late Middle Ages was frequently a constructed ideal rather than a lived experience

The Archaeology of Medieval England and Wales John Steane, 2014-10-30 In the preceding 25 years to this book's publication in 1985 there was an extensive and unprecedented burst of archaeological activity in evidence from below ground deposits above ground structures and artefacts During the boom of the late 1960s and 1970s which led to so much central town redevelopment it was buried remains which yielded the most dramatic information In the recession of the 1980s it was realised that upstanding remains had a lot to offer as well and they were being subject to ever more sophisticated study techniques This book examines those recent developments in archaeology and assesses their bearing on the study of medieval English and Welsh history Taking a series of important themes such as government religion and the countryside the book offers a chronological approach from the coming of the Vikings 850 AD to the Reformation in 1530 This approach focuses on the impact of man on the urban and rural landscape An important text for students of ancient history

*Canterbury Cathedral, Trinity Chapel* David S. Neal, Warwick Rodwell, 2022-09-15 Canterbury Cathedral possesses a unique marble mosaic pavement dating from the early twelfth century which has long intrigued scholars and been the subject

of speculation and debate It forms part of the floor of the Trinity chapel adjacent to the site where the shrine of St Thomas Becket stood prior to the Reformation Since the mosaic is older than the chapel itself and partly destroyed a pavement of figurative roundels laid c 1215 it must have been moved here from elsewhere in the cathedral This volume explores the history and archaeology of the Trinity chapel the pavement and the physical remains of the cult of Becket based largely on hitherto unrecorded and unpublished evidence In the early twelfth century Archbishop Anselm rebuilt the eastern arm of the cathedral introducing architectural elements from his native Italy and these included a magnificent mosaic pavement composed of the most expensive marbles which lay in front of the high altar In 1170 Archbishop Becket was murdered in the cathedral and his body rested overnight on the pavement before being buried in the crypt Thomas was immediately revered as a martyr and in 1173 was canonized by the pope a simple shrine was erected over his tomb In the following year a fire arson destroyed the eastern arm of the cathedral precipitating the construction of the present Trinity and Corona chapels wherein St Thomas s remains were enshrined After decades of delay and political strife the enshrinement took place in 1220 in the presence of Henry III The shrine comprised a great marble table supported on six clusters of columns On top of the table was a marble sarcophagus containing the saint s body in an iron bound timber coffin over which stood the sumptuous feretory a gabled timber roof plated with sheets of gold and adorned with jewels East of the shrine lies the small Corona chapel in which a fragment of Becket s skull was separately encased in a head shrine and to the west a large area was paved with forty eight figurative stone roundels created by French artisans All around stained glass windows display the early miracles of Becket The layout of the Trinity chapel underwent transmutations first around 1230 when the mosaic pavement was taken up from the old presbytery reduced in size and relaid in front of Becket s shrine where is it today Second the chapel was reordered in c 1290 when the podium carrying the shrine was enlarged and the paving around it reconfigured Medieval tombs were now being installed in the chapels including those of the Black Prince and Henry IV The end came in 1538 when Henry VIII ordered the thorough destruction of Becket s shrines but a great deal of archaeological evidence remained in the floors walls and a few surviving fragments of the shrines all now recorded and discussed in this volume for the first time

**The Temple Church in London** Robin Griffith-Jones, David Park, 2010 Founded as the main church of the Knights Templar in England at their New Temple in London the Temple Church is historically and architecturally one of the most important medieval buildings in England Its round nave modelled on the Holy Sepulchre in Jerusalem is extraordinarily ambitious combining lavish Romanesque sculpture with some of the earliest Gothic architectural features in any English building of its period It holds one of the most famous series of medieval effigies in the country The luminous thirteenth century choir intended for the burial of Henry III is of exceptional beauty Major developments in the post medieval period include the reordering of the church in the 1680s by Sir Christopher Wren and a substantial restoration programme in the early 1840s Despite its extraordinary importance however it has until now attracted little scholarly or critical attention a gap

which is remedied by this volume It considers the New Temple as a whole in the middle ages and all aspects of the church itself from its foundation in the twelfth century to its war time damage in the twentieth Richly illustrated with numerous black and white and colour plates it makes full use of the exceptional range and quality of the antiquarian material available for study including drawings photographs and plaster casts Contributors Robin Griffith Jones Virginia Jansen Philip Lankester Helen Nicholson David Park Rosemary Sweet William Whyte Christopher Wilson     *The Idea of the Castle in Medieval England* Abigail Wheatley,2015 Medieval castles have traditionally been examined as feats of military engineering tools of feudal control This book presents a different perspective by exploring the castle as a cultural reflection of the society that produced it seen through art literature     [Interpreting Medieval Effigies](#) Brian Gittos,Moira Gittos,2019-05-31 This innovative study examines and analyses the wealth of evidence provided by the monumental effigies of Yorkshire from the thirteenth and fourteenth centuries including some of very high sculptural merit More than 200 examples survive from the historic county in varying states of preservation Together they present a picture of the people able to afford them at a time when the county was frequently at the forefront of national politics and administration during the Scottish wars Many monuments display remarkable realism depicting people as they themselves wished to be remembered and are accompanied by a great volume of contemporary sculptural and architectural detail Stylistic analysis of the effigies themselves has been employed better to understand how they relate to one another and give a firmer basis for their dating and production patterns They are considered in relation to the history and material culture of the area at the time they were produced A more soundly based appreciation of the sculptor s intentions and the aspirations of patrons is sought through close attention to the full extent of the visible evidence afforded by the monuments and their surroundings The corpus is of sufficient size to permit meaningful analysis to shed light on aspects such as personal aspiration social networks patterns of supply and production piety and wealth It demonstrates the value of funerary monuments to the wider understanding of medieval society The text will be accompanied by a comprehensive catalogue making available a substantial body of research for the first time The study considers the relationship between the monuments and related sculpture architecture painting glass etc together with contemporary documentary evidence where it is available This material and the underlying methodology are now available to illuminate monuments of the medieval period across the whole country Its methods and messages extend understanding of all monuments broadening its potential audience from the purely local to everyone concerned with medieval sculpture and church archaeology     **Stone Conservation: Principles and Practice** Alison Henry,2015-12-08 Winner of the RIBA Book Award this important and timely publication brings together contributions from leading stone conservation practitioners It discusses the philosophical principles on which stone conservation is founded and the need to understand the full history and development of a building before starting work Other topics covered in this book include consolidation cleaning and the replacement of stone conservation of different stone types including limestone sandstone and

marble problems of dealing with polychrome stone and finally issues relating to church monuments and graveyards taking account of the need for good maintenance and health and safety requirements The book is illustrated with the authors own examples of stone conservation in practice Architects surveyors and craftsmen involved in the conservation of stone structures will find this both a practical and useful reference work
