Pure Senses:

Seeing New Worlds Laura Dassow Walls, 1995-11-01 Thoreau was a poet a naturalist a major American writer Was he also a scientist He was Laura Dassow Walls suggests Her book the first to consider Thoreau as a serious and committed scientist will change the way we understand his accomplishment and the place of science in American culture Walls reveals that the scientific texts of Thoreau s day deeply influenced his best work from Walden to the Journal to the late natural history essays Here we see how just when literature and science were splitting into the two cultures we know now Thoreau attempted to heal the growing rift Walls shows how his commitment to Alexander von Humboldt s scientific approach resulted in not only his marriage of poetry and science but also his distinctively patterned nature studies In the first critical study of his *The Dispersion of Seeds* since its publication in 1993 she exposes evidence that Thoreau was using Darwinian modes of reasoning years before the appearance of *Origin of Species* This book offers a powerful argument against the critical tradition that opposes a dry mechanistic science to a warm organic Romanticism Instead Thoreau s experience reveals the complex interaction between Romanticism and the dynamic law seeking science of its day Drawing on recent work in the theory and philosophy of science as well as literary history and theory *Seeing New Worlds* bridges today s two cultures in hopes of stimulating a fuller consideration of representations of nature

Thoreauvian Modernities François Specq, Laura Dassow Walls, Michel Granger, 2013-02-01 Does Thoreau belong to the past or to the future Instead of canonizing him as a celebrant of pure nature apart from the corruption of civilization the essays in *Thoreauvian Modernities* reveal edgier facets of his work how Thoreau is able to unsettle as well as inspire and how he is able to focus on both the timeless and the timely Contributors from the United States and Europe explore Thoreau s modernity and give a much needed reassessment of his work in a global context The first of three sections *Thoreau and Non Modernity* views Thoreau as a social thinker who set himself against the modern currents of his day even while contributing to the emergence of a new era By questioning the place of humans in the social economic natural and metaphysical order he ushered in a rethinking of humanity s role in the natural world that nurtured the environmental movement The second section *Thoreau and Philosophy* examines Thoreau s writings in light of the philosophy of his time as well as current philosophical debates Section three *Thoreau Language and the Wild* centers on his relationship to wild nature in its philosophical scientific linguistic and literary dimensions Together these sixteen essays reveal Thoreau s relevance to a number of fields including science philosophy aesthetics environmental ethics political science and animal studies *Thoreauvian Modernities* posits that it is the germinating power of Thoreau s thought the challenge it poses to our own thinking and its capacity to address pressing issues in a new way that defines his enduring relevance and his modernity Contributors Kristen Case Randall Conrad David Dowling Michel Granger Michel Imbert Michael Jonik Christian Maul Bruno Monfort Henrik Otterberg Tom Pughe David M Robinson William Rossi Dieter Schulz François Specq Joseph Urbas Laura Dassow Walls , **Formal and transcendental logic** Edmund

Husserl, 2013-06-29 called in question then naturally no fact science could be presupposed Thus Plato was set on the path to the pure idea Not gathered from the de facto sciences but formative of pure norms his dialectic of pure ideas as we say his logic or his theory of science was called on to make genuine 1 science possible now for the first time to guide its practice And precisely in fulfilling this vocation the Platonic dialectic actually helped create sciences in the pregnant sense sciences that were consciously sustained by the idea of logical science and sought to actualize it so far as possible Such were the strict mathematics and natural science whose further developments at higher stages are our modern sciences But the original relationship between logic and science has undergone a remarkable reversal in modern times The sciences made themselves independent Without being able to satisfy completely the spirit of critical self justification they fashioned extremely differentiated methods whose fruitfulness it is true was practically certain but whose productivity was not clarified by ultimate insight They fashioned these methods not indeed with the everyday man's naivete but still with a naivete of a higher level which abandoned the appeal to the pure idea the justifying of method by pure principles according to ultimate a priori possibilities and necessities

Language of the Senses Kerry McSweeney, 1998-07-08 McSweeney discusses the sensory acuity that informed Wordsworth's Coleridge's Thoreau's Whitman's and Dickinson's finest achievements and then when blunted by illness or age contributed to an attenuation of their creative power He supplies a sensory profile or sensory history for each author and through close readings shows how this profile affected their relationship to the external world and their powers of symbolic perception Using perspectives gleaned from the poets themselves and an understanding of the physiological ground of perception McSweeney establishes a compelling theoretical basis for his approach In clear and elegant prose he studies the physical basis for aesthetic plenitude such as the sensory manifold of synaesthesia not only in the Romantic writers mentioned above but also in two Victorian poets Hopkins and Tennyson

Mind and Body Alexander Bain, 1878 [Bhagavad Gita Demystified Volume 1](#) Nithyananda Paramahansa, 2009 *The Princeton Review*, 1884 *New Princeton Review*, 1884 [The New Experience of the Supersensible](#) Jesaiah Ben-Aharon, 2007 According to Rudolf Steiner's spiritual science the greatest spiritual event of our time is the renewal and reawakening of our human suprasensory relationship to the higher spiritual worlds The force that leads to this development called by various names in different cultural and religious traditions is called the Christ impulse by Anthroposophy in accordance with Christian terminology Because of new naturally endowed suprasensory faculties human beings are increasingly able to experience and perceive through an act of grace the great spiritual force of the Christ impulse

This experience is said to be a naturally given initiation and today we increasingly hear of such suprasensory experiences. Today however a healthy approach to these natural phenomena requires us to comprehend suprasensory experiences with full awareness and clear thinking. This book builds an all important bridge between the naturally given suprasensory experience and its conscious cognition. As a result empirical suprasensory research can investigate the different aspects of Christ's etheric becoming and appearance in a way that both methodically and experientially fulfils the justified cognitive and scientific requirements of our age. This new paperback edition adds a new introductory chapter.
