textbook for methods courses and a major contribution to sociological theory this book teaches students the principles of research and how to construct and test theories It brings coherence to the study of methods by presenting four major approaches to experimentation survey research participant observation life histories and unobtrusive measures from a single theoretical point of view symbolic interaction It demonstrates the need for a synthesis between theory and methods and shows how different methods limit and affect research results Denzin s argues that no single method theory or observer can capture all that is relevant or important in reality He argues for the use of triangulation and for a view of theory and methods as concept sensitizers His approach enables sociologists to acquire specific facts about a particular situation while simultaneously elevating these to the level of shared meaning The author shows students how to proceed with research bringing sharply into focus the possibilities and their limitations Since his view is integrated rather than eclectic this is much more than a how to do it manual Denzin points out aspects of research that fall outside the scope of a given method yet affect results and emphasizes the need to employ several methods to cross check each other The Research Act covers all the content of conventional methods courses The presentation is exciting and imaginative and provides a thorough review of major sociological methods a cogent statement about approaches to sociological inquiry and a source from which a understanding of the problems of research can be derived Norman K Denzin is professor of sociology cinema studies and interpretive theory at the University of Illinois Urbana Champaign He was awarded the George Herbert Mead Award for Lifetime Achievement from the Society for the Study of Symbolic Interaction He is the author of several books including *The Alcoholic Society Children and Their Caretakers Hollywood Shot by Shot Sociological Methods and The Values of Social Science* all available from Transaction      [The ...
