Making Radio Steve Ahern, 2020-07-25 The distilled wisdom and passion of top practitioners makes this an invaluable guide to making radio in Australia Siobhan McHugh award winning radio feature producer and lecturer University of Wollongong a very useful hands on guide to radio production in Australia Gail Phillips Associate Professor of Journalism Murdoch University Making Radio has been a core text for all our radio courses since it was written It covers everything from the basics you need to know when you begin your radio career to high level skills required for career advancement Kim Becherand AFTRS Radio Division Making radio programs gets into your blood it's one of the most stimulating jobs in the world in a fast moving industry at the cutting edge of digital technology Making Radio is a practical guide for anyone who wants to learn how to make good radio in the era of Radio 2.0 It examines the key roles in radio announcing presenting research copywriting producing marketing and promotions It also outlines what is involved in creating different types of radio programs news and current affairs music talkback comedy and WC features as well as legal and regulatory constraints With contributions from industry experts the third edition reflects the impact of digital radio including multi platform delivery listener databases social media and online marketing It also examines how radio stations have reinvented their business models to accommodate the rapid changes in communications and listener expectations Singapore Radio Bradley C. Freeman, Yokanathan Ramakrishnan, 2016-04-26 The world of media moves quickly nowhere is this more the case than Singapore a world class alpha city that prides itself on being first This book tracks the journey of Singapore radio from its humble beginnings to its advanced modern day incarnations Along the way Freeman and Ramakrishnan also detail economic political cultural and technological aspects of this medium in Singapore The role of radio is deliberated as well as the times when radio and its personalities have broken the rules In addition campus radio and social media are also discussed The book functions as a treasure trove partial archive and starting point for those interested in knowing more about the radio portion of Singapore's media landscape At the same time it serves as a fitting birthday present to the medium as radio meets and passes the 80 year mark in the country As such the book makes significant contributions to multiple aspects of the radio medium as it exists in Singapore aspects that are not to be found anywhere else **New Media Worlds** Virginia Nightingale, Tim Dwyer, 2007 Uses a mix of case studies theoretical reflection and critical analysis to explore four central issues for the study of new media and their impact on user communities the impact of convergence activism access and participation in new media Throughout it emphasises the way audiences are experiencing changes in the media

Demystifying Asian Values in Journalism Xiaoge Xu, 2005 Few studies have fully examined Asian values in journalism and

the related debate in terms of their contexts evolution features limitations contributions and implications Little research has comprehensively looked into the components and origins of Asian values in journalism although their existence has been sporadically investigated Consequently the topic has been much mystified Placed in the theoretical framework of ideological domination and control the book is designed to demystify the topic by addressing nine questions regarding the above mentioned areas through documentary research and historical comparative analysis It was discovered that Asian values in journalism reflected efforts to construct Asian press models and were also used to chart directions and dimensions for the press development in Asia although the values were conceptually elusive and theoretically confusing Another finding was that the Asian values in journalism are not purely Asian but do share journalistic traditions One major finding is that the Asian values in journalism debate is an extension of the ongoing battle between Asia and the West for ideological dominance and control in journalism Instead of sporadic and unsystematic studies the author proposes an integrated approach in the search for Asian values of journalism and the construction of Asian press models

Fist, 2012-12-06 This is not a dictionary and nor is it an encyclopedia It is a reference and compendium of useful information about the converging worlds of computers communications telecommunications and broadcasting You could refer to it as a guide for the Information Super Highway but this would be pretentious It aims to cover most of the more

important terms and concepts in the developing discipline of Informatics which in my definition includes the major converging technologies and the associated social and cultural issues Unlike a dictionary this handbook makes no attempt to be prescriptive in its definitions Many of the words we use today in computing and communications only vaguely reflect their originations And with such rapid change older terms are often taken twisted inverted and mangled to the point where any attempt by me to lay down laws of meaning would be meaningless The information here is descriptive I am concerned with usage only This book therefore contains keywords and explanations which have been culled from the current literature from technical magazines newspapers the Internet forums etc This is the living language as it is being used today not a historical artifact of 1950s computer science
