Right To Development A Primer:

The Right to Development Centre for Development and Human Rights, 2004-05-25 The Right to Development RTD a concept that emerged in the 1970s is one of the most debated and contentious issues in international relations RTD builds on the rights based approach to development seeking to integrate the norms and principles of human rights with policies and plans to promote development Despite its importance for the world s poor and dispossessed a great deal of definitional confusion still surrounds the concept This primer introduces the concept of RTD as well as discusses its practical application in the Indian setting It is divided accordingly into two sections the first of which traces the origins and the evolution of the idea of RTD This section identifies the defining parameters and content of RTD and focuses especially on the three rights the rights to food education and health that have been identified as a good starting point for the implementation of RTD The last chapter in this section underscores the importance of women s rights in order to emphasise the need to focus on safeguarding and promoting the human rights of vulnerable groups Part II covers substantially the Indian situation relating to RTD The first chapter in this section provides an overview of the legal and institutional mechanism in India for the protection of human rights in general and women s rights in particular The next chapter examines the implementation of the rights to food health and education The last chapter in this section details the functioning of Public Interest Litigation PIL which has emerged in recent years as an important mechanism for securing social justice and the challenges and limitations of this mechanism

The Right to Development in International Law Khurshid Iqbal, 2009-09-10 The Right to Development in International Law rigorously explores the right to development RTD from the perspectives of international law as well as the constitutionally guaranteed fundamental rights and the Islamic concept of social justice in Pakistan The volume draws on a wide range of relevant sources to analyse the legal status of international cooperation in contemporary international law before exploring the domestic application of the right to development looking at the example of Pakistan a country that is undergoing radical transformation in terms of its internal governance structures and the challenges it faces for enforcing the rule of law Of particular importance is the examination of the RTD and Shari ah law in Pakistan which adds a new perspective to the RTD debate and enriches the discussion about human rights and Shari ah across the world Through focusing on Pakistan the book links international perspectives and the international human rights framework with the domestic constitutional apparatus for enforcing the RTD within that jurisdiction In doing so Khurshid Iqbal argues that the RTD may be promoted through existing constitutional mechanisms if fundamental rights are widely interpreted by the superior courts effectively implemented by the lower courts and if Shari ah law is progressively interpreted in public interest Iqbal s work will appeal to researchers professionals and students in the fields of law human rights development

international law South Asian Studies Islamic law and international development studies **Reflections on the Right To Development** Arjun Sengupta, Archana Negi, Moushumi Basu, 2005 The Right to Development RTD is a new and highly

contested right Its emergence is linked to the demand for a new international economic order by developing countries Composite in nature and integrating civil and political rights with economic social and cultural rights the RTD approach underscores participation a fair sharing of benefits transparency and non discrimination The present volume explores the theoretical and practical aspects of RTD as an alternative to existing approaches to development It brings together the reflections and insights of some of the finest scholars on the specific aspects of RTD The Right to Development ,2004 Providing A Comprehensive Lucid And Innovative Synthesis Of Current Thinking On Rtd This Book Will Be Of Considerable Interest To Human Rights Activists Government Departments And Planning Agencies And Non Governmental Organisations Working In The Fields Of Development And Or Human Rights While Being Of Equal Interest To Researchers In The Fields Of Development Human Rights And Law **Elgar Encyclopedia of Development** Matthew Clarke,Xinyu (Andy) Zhao,2023-10-06 The Elgar Encyclopedia of Development is a ground breaking resource that provides a starting point for those wishing to grasp how and why development occurs while also providing further expansion appropriate for more experienced academics Brownlie's Documents on Human Rights Ian Brownlie,Guy S Goodwin-Gill,2010-06-24 Basic Documents on Human Rights provides a collection of key documents and covers all elements of the subject It is an account of the most important instruments adopted by the UN its agencies regional organizations and other actors *Handbook of Research on International Consumer Law, Second Edition* Geraint Howells,Iain Ramsay,2018-07-27 Consumer law and policy continues to be of great concern to both national and international regulatory bodies and the second edition of the Handbook of Research on International Consumer Law provides an updated international and comparative analysis of the central legal and policy issues in both developed and developing economies **Human Rights** Albert A. Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to

education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic

International Economic Law and the Digital Divide Rohan Kariyawasam, 2008-01-01 In this well researched book the author explains the digital divide and its repercussions for developed and developing nations In his view the overzealous disciplining at the WTO level of instruments affecting trade notwithstanding developing countries still have important tools in their hands intellectual property protection competition policies tax regimes that can help them attract foreign direct investment a crucial ingredient in reducing the current divide Borrowing from the institutions that we have seen developed in international economic relations is highly recommended as well In short whether the divide will continue to persist or conversely whether it will gradually become a historical feature of international relations critically depends on the political will on both sides of the divide The author makes a persuasive argument to support his thesis empirically researched and with strong foundations in theory Petros C Mavroidis Columbia Law School US and University of Neuchâtel Switzerland This path breaking book focuses on the WTO e commerce and information communications technologies It sheds light on how international economic law can be used as a tool in the application of technological processes to facilitate development in developing countries Rohan Kariyawasam begins by looking predominantly at the rise of international digital networks He offers an introduction to the networks used in the delivery of electronic products and network based transactions and the application of WTO law to the sector He then suggests how developing countries can use economic law and technology to tap digital markets in the developed world The

book also argues that the advance of basic living standards in some developing countries can be achieved through technological processes but that this cannot happen without such states paying greater attention to the enforcement of economic social and cultural rights at home Picking up the property rights debate including through bilateral trade the author argues that ensuring beneficial technology transfer will require balancing foreign investor rights to protect intellectual property It will also involve restrictions imposed by competition law and WTO surveillance to check the possible misuse of market power by multinational companies The proposed mixture of measures should he argues provide incentives for Foreign Direct Investment Providing a thorough review of the application of WTO law to the telecommunications sector and the regulation of international digital networks this book will be of great interest to postgraduate students in international economic law and international development law as well as those interested in human rights law and technology It will also appeal to government regulators NGOs and technologists interested in ICTs and development
