**How to Read Chinese Prose in Chinese** Zong-qi Cai, Jie Cui, Liu Yucai, 2022-01-18 This book is at once a guided introduction to Chinese nonfictional prose and an innovative textbook for the study of classical Chinese. It is a companion volume to *How to Read Chinese Prose: A Guided Anthology* designed for Chinese language learners. *How to Read Chinese Prose in Chinese* presents more than forty prose works either excerpts or in full from antiquity through the Qing dynasty. While teaching readers how to appreciate the rich tradition of Chinese prose in its original form, the book uses these texts to introduce classical Chinese to advanced learners, helping them develop reading comprehension and vocabulary. It offers a systematic guide to classical Chinese grammar and abundant notes on vocabulary and features an extensive network of notes, exercises, and cross references. The book includes modern translations of the forty prose works in simplified Chinese presented alongside the original texts in traditional Chinese. It also includes expert commentaries on each text's distinctive aesthetic qualities as well as historical and cultural contexts. The book comprises thirty-eight lessons within eight units organized chronologically to reflect the emergence of major prose genres. It is a major contribution to the teaching and study of classical Chinese language and literature. Audio recordings of all forty texts are available online free of charge.

The purpose of *Chinese-English Dual Language Immersion Programs: Content Area Instruction, Learners, and Evaluations* is to explore three DLI themes that are under-researched: content area instruction, learners, and evaluations. The first section of this edited volume is dedicated to exploring current teaching designs and practices in different content subjects in Chinese DLI programs in order to make useful teaching suggestions to the programs. The second section includes studies which look into K-12 Chinese DLI learners' learning variables such as motivations, learning strategies, learner perception, and engagement, and learner background differences. The last section of this edited volume intends to fill the research gap by including studies which adopt various methods to evaluate Chinese DLI students' target language level to better illustrate their learning progress in different language skills.
