China's New Sources of Economic Growth: Vol. 2 Ligang Song,Ross Garnaut,Cai Fang,Lauren Johnston,2017-07-20 China s efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year s book

elucidates key present macroeconomic challenges facing China's economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China's economy. The book explores the development of human capital as the foundations of China's push into more advanced growth frontiers. It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China's human capital investments to success on this front. The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions, sectors, and invention motivations. Included are chapters providing an update on reform and macroeconomic development, educational inequality, the role of intangibles in determining China's economic growth, and China's progress in transitioning towards being an innovative country. The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity, renewable energy, and financial markets. Chapters on trade, investment, regional cooperation, and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally.

Limitless Supply: New Economy In The Digital Era Chunsheng Zhou, Xiuhai Hu, 2022-04-08. Scarcity hypothesis is the cornerstone of traditional economic theory. However, in the digital era, new products such as Windows, Android, and Wechat have been introduced to the market. Traditional economic theory may not be able to explain various new economic phenomena in the digital era. This book creatively proposes the concept of limitless supply and then discusses its implications for economy at both macro and micro levels. It analyses and summarizes the basic features of limitless supply products and compares the differences and similarities of how limited supply and limitless supply products are manufactured and marketed. The book also provides reasons for why manufacturers of limitless supply products create intangible assets. It argues that the scale of an enterprise producing limitless supply products depends on the number of users, whereas the scale of an enterprise producing limited supply products depends on the production capacity. This book is mainly written to construct a preliminary, simple yet relatively comprehensive economic theory framework for limitless supply and to interpret the phenomena and corporate behaviour. It further explores how enterprises providing limitless supply products grow financially. It also proposes the fundamental difference in growth models between enterprises providing limitless supply products and those providing limited supply products. The book also looks at how growth models can achieve fission growth.

Demystifying China's Innovation Machine Marina Yue Zhang, Mark Dodgson, David Gann, 2022. China's extraordinary economic development is explained in large part by the way it innovates. Contrary to widely held views, China's innovation machine is not created and controlled by an all-powerful government. Instead, it is a complex interdependent system composed of various elements involving bottom-up innovation driven by innovators and entrepreneurs and highly pragmatic and adaptive top-down policy. Using case studies of leading firms and

industries along with statistics and policy analysis this book argues that China's innovation machine is similar to a natural ecosystem. Innovations in technology organization and business models resemble genetic mutations which are initially random, self-serving and isolated but the best fitting are selected by the market and their impacts are amplified by the innovation machine. This machine draws on China's multitude of manufacturers, supply chains, innovation clusters and a digitally literate population connected through super-sized digital platforms. China's innovation suffers from a lack of basic research and reliance upon certain critical technologies from overseas yet its scale, size and scope diversity possess attributes that make it self-correcting and stronger in the face of challenges. China's innovation machine is most effective in a policy environment where the market prevails; policy intervention plays a significant role when market mechanisms are premature or fail. The future success of China's innovation will depend on continuing policy pragmatism, mass innovation and entrepreneurship and the development of the new infrastructures.

New Dual Economy: New Economic Prosperity And The Reengineering Of The Traditional Economy Chunsheng Zhou, Ziliang Wang, 2025-04-02. This book attempts to establish a new theoretical framework to analyze the intrinsic patterns of economic growth, structural transformation and the shift of economic momentum in the digital economy era. The book provides a detailed discussion on the interactions between the old and new economic sectors, the limitless and limited sectors, the migration of labor and capital between different sectors as well as the accumulation of knowledge capital such as data, technology and creativity. Additionally, it delves into the growth mechanisms of the new dual economy. Given the characteristics of competition and deep integration between the limitless and limited sectors in the new dual economy era, the book also explores the transformation and digitalization of traditional enterprises. This book not only focuses on theoretical innovation and exploration but also closely relates to the realities of new economic development and China's economic transformation. It holds reference value for economic researchers, government departments and entrepreneurs.

China's Digital Silk Road Gerald Chan, 2022-11-15. In recent years, China has become a world leader in e-commerce, e-currency, 5G and artificial intelligence, cementing itself as a major competitor to established powers. Gerald Chan poses the question: How has China pulled this off? Arguing that the answer lies in the country's Digital Silk Road, a multi-faceted programme to connect the world via digital means, the book explores how China has shaped the development of the digital order, secured a critical role in internet governance and upset the status quo powers.
