**France, Britain, and the Struggle for the Revolutionary Western Mediterranean** Joshua Meeks,2017-01-23 This book investigates the conflict over control over the Western Mediterranean in the late eighteenth century The Western Mediterranean during the 1790s featured a constant struggle for control over the region While most histories point to military events such as the Italian Campaign as descriptive of this struggle between the two competing ideological forces of Revolutionary France and the Counter Revolutionary First Coalition led by Britain this book takes a different approach Rather than looking at the struggle between ideologies this book looks at the struggle within those ideologies arguing that the Western Mediterranean states were not simply the battlefields or the prizes of the struggle but were active participants with goals of autonomy or neutrality The focus stretches beyond conflict between France and

Britain into the adaptation of ideology for different uses in Tuscany Toulon Algiers Spain and especially Corsica *European War and Diplomacy, 1337-1815* William Young, 2003-10 The history of international relations and warfare of early modern Europe has gained popularity in recent years This bibliography provides a valuable listing of books dissertations and journal articles in the English language for scholars and general readers interested in diplomatic relations and warfare from the Hundred Years War to the Napoleonic Wars America Or Europe? Kegley, Gregory A. Raymond, 2020-02-12 Great Powers and World Order encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future Charles W. Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war but also the consequences of peace settlements Historical case studies open a window to see what strategies for constructing world order were tried before why one course of action was chosen over another and how things turned out By moving back and forth in each case study between history and theory rather than treating them as separate topics the authors hope to situate the assumptions causal claims and policy prescriptions of different schools of thought within the temporal domains in which they took root giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision **Empires, Systems and States** Michael Cox, Timothy Dunne, Ken Booth, 2001 This volume brings together a collection of leading scholars to consider various dimensions of the turn to history in International Relations The scope of this volume is broad It includes conventional accounts of the development of the European states system but is not limited by it Other essays consider the non European experience a number of path breaking essays on how other cultures and continents have ordered their political communities in particular the question how and why a states system triumphed over other forms of political organisation The theme of the subtitle great transformations is pursued by each author The essays consider one of the biggest questions of our time namely how did we arrive at this historical and institutional expression of political community And what alternative future world orders exist The volume will be of interest to scholars of International Relations and History interested in great transformations in world politics *The Anatomy of Revolution Revisited* Bailey Stone, 2014 This study aims to update a classic of comparative revolutionary analysis Crane Brinton's 1938 study *The Anatomy of Revolution* It invokes the latest research and theoretical writing in history political science and political sociology to compare and contrast in their successive phases the English Revolution of 1640-60 the French Revolution of 1789-99 and the Russian Revolution of 1917-29 This book intends to do what no other comparative analysis of revolutionary change has yet adequately done It not only progresses beyond Marxian socioeconomic class analysis and early revisionist stresses on short term accidental factors involved in revolutionary

causation and process it also finds ways to reconcile state centered structuralist accounts of the three major European revolutions with postmodernist explanations of those upheavals that play up the centrality of human agency revolutionary discourse mentalities ideology and political culture

**The Social Interpretation of the French Revolution** Alfred Cobban, 1999-05-27 Alfred Cobban's The Social Interpretation of the French Revolution is one of the acknowledged classics of post war historiography This revisionist analysis of the French Revolution caused a furore on first publication in 1964 challenging as it did established orthodoxies during the crucial period of the Cold War Cobban saw the French Revolution as central to the grand narrative of modern history but provided a salutary corrective to many celebrated social explanations determinist and otherwise of its origins and development A generation later this concise but powerful intervention was reissued in this 1999 edition with an introduction by Gwynne Lewis providing students with both a context for Cobban's own arguments and assessing the course of Revolutionary studies in the wake of The Social Interpretation This book remains a handbook of revisionism for Anglo Saxon scholars and is essential reading for all students of French history at undergraduate level and above

recurrent types of human action and activity are perhaps the most fundamental building blocks of social reality This book argues that the detailed empirical study of practices is essential to effective social scientific inquiry It develops a philosophical infrastructure for understanding human practices and argues that practice theory should be the analytical centrepiece of social theory and the philosophy of the social sciences What would social scientists research look like if they took these insights seriously To answer this question the book offers an analytical framework to guide empirical research on practices in different times and places The author explores how practices can be identified characterised and explained how they function in concrete contexts and how they might change over time and space The Constitution of Social Practices lies at the intersection of philosophy social theory cultural theory and the social sciences It is essential reading for scholars in social theory and the philosophy of social science as well as the broad range of researchers and students across the social sciences and humanities whose work stands to benefit from serious consideration of practices

**A Military Revolution?** Jeremy Black,1991-11-11 In this radical reassessment Jeremy Black challenges many of the established assumptions about the so called Military Revolution of 1560 1660 He argues that it is far from clear that a military revolution did occur during this period Indeed there is more evidence to suggest that the description could be applied more accurately to the following hundred years This book also re examines the relationship between military strength and domestic stability Rather than seeing the latter as the consequence of the former Dr Black argues that it makes more sense to see the former as a result of the latter

**An Age of Neutrals** Maartje Abbenhuis,2014-06-12 An Age of Neutrals provides a pioneering history of neutrality in Europe and the wider world between the Congress of Vienna and the outbreak of the First World War The long nineteenth century 1815 1914 was an era of unprecedented industrialization imperialism and globalization one which

witnessed Europe's economic and political hegemony across the world Dr Maartje Abbenhuis explores the ways in which neutrality reinforced these interconnected developments She argues that a passive conception of neutrality has thus far prevented historians from understanding the high regard with which neutrality as a tool of diplomacy and statecraft and as a popular ideal with numerous applications was held This compelling new history exposes neutrality as a vibrant and essential part of the nineteenth century international system a powerful instrument used by great and small powers to solve disputes stabilize international relations and promote a variety of interests within and outside the continent *The French Revolution* Gwynne Lewis, 2002-11-01 First Published in 2004 Historical Connections is a new series of short books on important historical topics and debates written primarily for those studying and teaching history The books will offer original and challenging works of synthesis that will make new themes accessible or old themes accessible in new ways build bridges between different chronological periods and different historical debates and encourage comparative discussion in history This book is divided into two parts Part I provides an interpretation of events covering the causes and course of the Revolution Part II focuses more specifically upon the controversies surrounding the economic social and cultural policies associated with the Revolution *Republics at War, 1776-1840* P. Serna, A. De Francesco, J. Miller, 2013-10-11 This collection probes the troubling connections between war and republic during Revolutionary era 1776-1840 It presents the work of an international team of scholars some of them in English for the first time
