The Day We Lost the H-Bomb Barbara Moran, 2009-04-28 In The Day We Lost the H Bomb science writer Barbara Moran marshals a wealth of new information and recently declassified material to give the definitive account of the Cold War's biggest nuclear weapons disaster On January 17 1966 a U S Air Force B 52 bomber exploded over the sleepy Spanish farming village of Palomares during a routine airborne refueling The explosion killed seven airmen and scattered the bomber's payload four unarmed thermonuclear bombs across miles of coastline Three of the rogue H bombs were recovered quickly Tracking down the fourth required the largest search and salvage operation in U S military history Moran traces the roots of the Palomares incident giving a brief yet in depth history of the Strategic Air Command and its eccentric larger than life commander General Curtis LeMay whose massive deterrence strategy kept armed U S bombers aloft at all times Back on the ground Moran recounts the myriad social and environmental effects of an accident that spread radioactive debris over hundreds of acres of Spanish farmland alarmed America's strategic allies and damaged Spanish American diplomatic relations As the American military floundered in its attempt to keep the story secret the events in Spain

sometimes took on farcical overtones Constant global media hype was fueled by the hit James Bond movie Thunderball with its plot about an atomic weapon lost at sea In addition there were the unwanted attentions of a rusty hulled Soviet surveillance ship and even awkward public relations stunts complete with American diplomats in swim trunks The Day We Lost the H Bomb is a singular work of military history that effortlessly and dramatically captures Cold War hysteria high stakes negotiations and the race to clean up a disaster of unprecedented scope At once epic and intimate this book recounts in stunning detail the fragile peace Americans had made with nuclear weapons and how the specter of imminent doom forced the United States to consider not only what had happened over Palomares but what could have happened This forgotten chapter of Cold War history will grip readers with the tension of that time and reawaken the fears and hopes of that dangerous era

To Rule the Skies Brent D Ziarnick, 2021-02-15 *To Rule the Skies* General Thomas S Power and the Rise of Strategic Air Command in the Cold War fills a critical gap in Cold War and Air Force history by telling the story of General Thomas S Power for the first time Thomas Power was second only to Curtis LeMay in forming the Strategic Air Command SAC one of the premier combat organizations of the twentieth century but he is rarely mentioned today What little is written about Power describes him as LeMay's willing hatchet man uneducated unimaginative autocratic and sadistic Based on extensive archival research General Power seeks to overturn this appraisal Brent D Ziarnick covers the span of both Power's personal and professional life and challenges many of the myths of conventional knowledge about him Denied college because his middle class immigrant family imploded while he was still in school Power worked in New York City construction while studying for the Flying Cadet examination at night in the New York Public Library As a young pilot Power participated in some of the Army Air Corps most storied operations In the interwar years his family connections allowed Power to interact with American Wall Street millionaires and the British aristocracy Confined to training combat aircrews in the United States for most of World War II Power proved his combat leadership as a bombing wing commander by planning and leading the firebombing of Tokyo for Gen Curtis LeMay After the war Power helped LeMay transform the Air Force into the aerospace force America needed during the Cold War A master of strategic air warfare he aided in establishing SAC as the Free World's Big Stick against Soviet aggression Far from being unimaginative Power led the incorporation of the nuclear weapon the intercontinental ballistic missile the airborne alert and the Single Integrated Operational Plan into America's deterrent posture as Air Research and Development Command commander and both the vice commander and commander in chief of SAC Most importantly Power led SAC through the Cuban Missile Crisis in 1962 Even after retirement Power as a New York Times bestselling author brought his message of deterrence through strength to the nation Ziarnick points out how Power's impact may continue in the future Power's peerless but suppressed vision of the Air Force and the nation in space is recounted in detail placing Power firmly as a forgotten space visionary and role model for both the Air Force and the new Space Force *To Rule the Skies* is an important contribution to the history of the Cold War and beyond *Strategic Review*

Moon Rising Matthew Brzezinski recounts the dramatic behind the scenes story of the fierce battles on earth that preceded and followed the launch of Sputnik on October 4 1957 He takes us inside the Kremlin the White House secret military facilities deep cover safe houses and the halls of Congress to bring to life the Russians and Americans who feared and distrusted their compatriots at least as much as their superpower rivals Drawing on original interviews and new documentary sources Brzezinski tells a story rich in the paranoia of the time and the combatants include three U S presidents survivors of the gulag corporate chieftains ambitious apparatchiks rehabilitated Nazis and a general who won the day by refusing to follow orders The true story of the birth of the space age has never been told in such vivid detail and Red Moon Rising brings it memorably to life A spectacular and accessible history of the space race Brzezinski displays depth insight and showmanship USA Today Brzezinski is a wonderfully colorful writer combining a scientific plotline with the history and characters of a Cold War thriller The Times London The writing is fast paced and crisp the stakes high and the tension palpable from the first pages of this high flying account of the early days of the space race between the U S and U S S R Publishers Weekly starred review Comparable to Paul Dickson s Sputnik Shock of the Century Brzezinski s speedy narrative of the first satellite slings readers from launch pads to conference rooms A kinetic rendition of Sputnik this will score with spaceflight buffs Booklist

Shaping U.S. Military Forces for the Asia-Pacific Michael R. Kraig, 2014-06-04 The first twenty years of post Cold War US defense and diplomatic policies toward Asia have looked a good deal like the previous 50 namely continued deterrence based upon overwhelming offensive military predominance In East Asia all powers harbor common and divergent interests based on fragmented nationalist identities and complex economic interdependence In this multipolar Asian system new Chinese military capabilities could support both the wish to secure its own interests as well as a more expansive vision for regional leadership which might harbor a destabilizing geopolitical agenda How the United States addresses this reality via military procurements and employment concepts for the Asian theater could either detract from or enhance crisis stability The US defense establishment must reorient its force posture to save money manage conflicts of interest and prevent future interstate crises This analysis provides a framework for how the United States should ideally structure and use military power so as to best support the diplomatic resolution of conflicting interests without resorting to full scale warfare It also critiques the usual Western military focus on offensive strategic predominance in force postures itself often fuelled by the unrealistic pursuit of the opponent s complete submission via victory in decisive battles

Assured Destruction David Bath, 2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air

Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war
