The Rise of the Social Sciences and the Formation of Modernity J. Heilbron, Lars Magnusson, Björn Wittrock, 2013-12-01

This volume offers one of the first systematic analyses of the rise of modern social science. Contrary to the standard accounts of various social science disciplines the essays in this volume demonstrate that modern social science actually emerged during the critical period between 1750 and 1850. It is shown that the social sciences were a crucial element in the conceptual and epistemic revolution which paralleled and partly underpinned the political and economic transformations of the modern world. From a consistently comparative perspective a group of internationally leading scholars takes up fundamental issues such as the role of the Enlightenment and the French Revolution in the shaping of the social sciences the changing relationships between political theory and moral discourse the profound transformation of philosophy and the constitution of political economy and statistics.

**Frontiers of Sociology** Peter Hedström, Björn Wittrock, 2009-01-01

The 37th World Congress of the IIS focused on theory and research at the forefront of sociology and the relationship between sociology and its neighbouring disciplines. This volume constitutes a sustained effort by prominent sociologists and other social scientists to assess the current standing of sociology. It is a stocktaking of the unique nature of sociology in the light of advances within the discipline itself and within a range of neighbouring disciplines. Some of the chapters outline institutional and professional strategies for sociology in the new millennium. Others trace scholarly advances and propose ambitious research programmes drawing on recent developments not only within traditional neighbouring disciplines such as history political science and economics but also within the cognitive cultural and mathematical sciences. Contributors include Hans Peter Blossfeld Raymond Boudon Richard Breen Christofer R Edling S N Eisenstadt Jack Goldstone Philip Gorski Peter G rdenfors Ulf Hannerz Peter Hedstr m Hans Joas Dietrich Rueschemeyer Jens Rydgren Neil Smelser Aage B S rensen Richard Swedberg Piotr Sztompka Peter Wagner and Bj rn Wittrock

**Culture and Context in World Politics** Stephanie Lawson, 2006-09-05. This wide ranging historically informed study examines the career

of the culture concept and related notions of context in comparative and international politics tracing connections through the disciplines of anthropology and history as well as through issues in nationalism and democracy *Languages of Belief and Early Sociology in Nineteenth-Century France* Michiel Van Dam, 2024-09-27 This book presents a new reading of the history of French social science and religion through an investigation of early sociology's techniques for narrating the category of belief The author argues that by looking at the history of social sciences in this manner we gain a deeper understanding of both our present debates on post secularity as well as our modernist past both of which were thoroughly shaped by their reflections and critiques on the notion of belief yet failed to enter into any sort of meaningful communication with each other This book seeks to rectify this failure by introducing the concept of belief languages an anthropological framework designed to historicize different discussions on belief and allow for their comparative description and analysis

**Sociological Knowledge and Collective Identity** Stavit Sinai, 2019-03-28 Sociology emerging in the 19th century as the study of national societies is the intellectual product of its time power relations and social imaginaries As a discursive practice that was enmeshed in the meta narratives of modernity the discipline of sociology bears the inherent capacity to shape socially shared concepts and construct collective identities This book examines the relationships between sociology and projects of national identity construction and presents a critique of Shmuel N Eisenstadt the prominent Israeli sociologist known as the father of Israeli sociology The book focuses on Eisenstadt's sociology of Israel as a case of knowledge construction within an ideological system and examines the relationships between his various sociological analyses of Israeli society and the Zionist imaginary namely the deeply entrenched political myths and historiographical narratives that constitute Israel's hegemonic national identity By emphasizing the interrelation between textuality identity and loaded language the volume seeks to demythologize Eisenstadt's sociology of Israel Three major concepts in Eisenstadt's scholarship are specifically thematized integration civilization and modernities In each of these foci the author shows how Eisenstadt's sociological conjectures reproduce dominant Zionist historiographical representations of the past rationalize prevalent social hierarchies reify the boundaries of a national collective Self and render legitimacy to Israel's governing ethnocratic tendencies underlying the premises of the Zionist settler colonial project *Sociological Knowledge and Collective Identity* will appeal to those interested in the interconnectedness of sociology and political memory as well as in a radical postcolonial reconstruction of sociology *Beyond Reason* Sanjay Seth, 2021 Introduction Part I Modern western knowledge under challenge Unsettling the modern knowledge settlement Defending reason a postcolonial critique Part II Postcolonialism and social science The code of history The anachronism of history International relations amnesia and empire Political theory and the bourgeois public sphere Epilogue Knowledge and politics *Social Studies of Science and Technology: Looking Back, Ahead* B. Joerges, H. Nowotny, 2012-12-06 BERNW ARD JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to

yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction. It was meant to mark the millennial turn, a seemingly purely chronological event but one in search for great meanings and invested with loaded significances. The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology. The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way. Since then the world appears more vulnerable and volatile, fragmented and fraught with uncertainty. The universal values bequeathed by the Enlightenment are either refused or appear refuted. The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters.

The Moral Fabric in Contemporary Societies Grażyna Sknińska, Anna Maria Orla-Bukowska, Krzysztof Kowalski, 2003. These IIS annals delve into the issues of trust, economic inequalities, multiple modernities, postcommunism, corruption, and finally genocide and its social consequences. The book opens and closes with reflections on the theoretical aspects of what constitutes the moral fabric today.

*Constructing Global Challenges in World Politics* Alina Isakova, Malte Neuwinger, Robin Schulze Waltrup, Oday Uraiqat, 2024-06-24. This interdisciplinary book investigates the problematization of global challenges in world politics by analyzing what they are and how they come to be. Offering a conceptual framework including four modes of construction: universalizing, bundling, upscaling, and creating urgency, this book provides a heuristic method for understanding how the process of rendering an issue a global challenge unfolds. It examines the role of the global challenges discourse which may either reinforce or challenge the dominant orders of world politics such as the capitalist market-based system and the liberal international order. As a consequence, the global challenges discourse facilitates the emergence of new actors and policy fields. The book will be of interest to students, academics, and practitioners of global governance, international organizations, and more broadly, international political economy and international relations.

**Axial Civilizations And World History** Jonathan P. Levenson, Shmuel Noah Eisenstadt, Björn Wittrock, 2005. A collection of essays by social theorists, historical sociologists, and area specialists in classical biblical and Asian studies. The contributions deal with cultural transformations in major civilizational centres during the Axial Age, the middle centuries of the last millennium BCE, and their long-term consequences.

*The Anthem Companion to Auguste Comte* Andrew Wernick, 2017-05-15. For most of the twentieth century, Auguste Comte, a controversial but highly influential nineteenth-century figure, and his vast treatises on positive philosophy, politics, and religion were disregarded and largely ignored. More recently, however, Comte's life and writings have been reexamined together with the project of social reform to which his intellectual labors were devoted, producing a much more complicated picture of his thought and its significance. *The Anthem Companion to Auguste Comte*, with ten new critical essays by leading Comte scholars, sociologists, intellectual historians, social theorists, and philosophers, aims to further this

reexamination while also providing a multifaceted introduction to Comte's thought and to current discussion about him. The essays also examine Comte's relation to a multiplicity of other thinkers and his place more generally in the formation and legacy of modern Western thought.

**Languages of Reform in the Eighteenth Century** Susan Richter, Thomas Maissen, Manuela Albertone, 2019-10-18. Societies perceive Reform or Reforms as substantial changes and significant breaks which must be well justified. The Enlightenment brought forth the idea that the future was uncertain and could be shaped by human beings. This gave the concept of reform a new character and new fields of application. Those who sought support for their plans and actions needed to reflect, develop new arguments and offer new reasons to address an anonymous public. This book aims to compile these changes under the heuristic term of languages of reform. It analyzes the structures of communication regarding reforms in the 18th century through a wide variety of topics.

*The Cambridge History of Science: Volume 7, The Modern Social Sciences* David C. Lindberg, Theodore M. Porter, Roy Porter, Ronald L. Numbers, 2003-08-04. This volume provides a history of the concepts, practices, institutions and ideologies of social sciences including behavioural and economic sciences since the eighteenth century. It offers original synthetic accounts of the historical development of social knowledge including its philosophical assumptions, its social and intellectual organization and its relations to science, medicine, politics, bureaucracy, philosophy, religion and the professions. Its forty-two chapters include inquiries into the genres and traditions that formed social science, the careers of the main social disciplines: psychology, economics, sociology, anthropology, political science, geography, history and statistics, and international essays on social science in Eastern Europe, Asia, Africa and Latin America. It also includes essays that examine the involvement of the social sciences in government, business, education, culture and social policy. This is a broad cultural history of social science which analyzes from a variety of perspectives its participation in the making of the modern world.

Public Spheres and Collective Identities Shmuel Noah Eisenstadt, Wolfgang Schluchter, Björn Wittrock. Today it is assumed that we understand contemporary nationalism and nation building. Researchers rarely consider the very different traditions from which such state building emerged. Instead, there is almost too much discussion of the global village with its supposed uniformity and inevitable trajectories. We need to view modernity as something other than a single condition with a preordained future. New visions of a modern civilization are emerging throughout the world, calling for a far-reaching appraisal of the older visions of modernization. Following Eisenstadt's and Schluchter's introduction, Björn Wittrock explores the varieties and transitions of early modern societies, noting that only by looking at societies' collective identities and their modes of mediating in the public sphere can the distinguishing factors between modernity be appreciated. Sheldon Pollock discusses the use of vernacular language in India through its literary culture and polity. 1000-1500. Sanjay Subrahmanyam sums up major developments in the recent historiography of South Asia from 1400 to 1750. David L. Howell focuses on the boundaries of the early modern Japanese state, including its political boundaries and the boundaries of collective identity and social status. Mary Elizabeth Berry examines

public life in authoritarian Japan Frederic Wakeman Jr probes the boundaries of the political game and how they were affected by the increased political centralization that developed after the disorder of the Ming Qing transition during the seventeenth century Alexander Woodside discusses territorial order and collective identity tensions in Confucian Asia Bernhard Giesen argues that the French Enlightenment can be described as an extension of absolutist court culture Finally essay Victor Prez Daz examines the state and public sphere in Spain during the Ancient Regime contrasting two ideal types of states a nomocratic model and a teleocratic model This volume addresses cultural and political practices not only from outside the European and American spheres but also over long periods of time in which the internal dynamics of other civilizations become visible Its broad ranging use of empirical materials enables us to think comparatively and historically about the ways in which different modernities took shape Shmuel N Eisenstadt is professor emeritus of sociology The Hebrew University of Jerusalem Wolfgang Schluchter is professor of sociology University of Heidelberg and dean of the Max Weber Center for Cultural and Social Studies University of Erfurt Björn Wittrock is Lars Hierta Professor of Government at Stockholm University and director and permanent fellow of the Swedish Collegium for Advanced Study in the Social Sciences SCASSS at Uppsala

The Dialogical Turn Charles Camic, Hans Joas, 2003-12-09 The discipline of sociology was born and has been recurrently reconstituted in response to the fragmentation of ideas about the social world For two centuries sociologists have sought refuge in synthesis programs designed to integrate multiple perspectives within a unifying framework Yet even as this cause has inspired many of the discipline's major thinkers past and present its objective has proven elusive leaving nearly as many syntheses as synthesizers This volume considers an alternative response that has recently developed within sociology to the crisis of intellectual fragmentation the dialogical turn Rather than decry the multiplicity of social theories research methods and results this response welcomes a plurality of orientations and approaches as the essential basis for establishing and maintaining productive dialogue Examining this exciting development The Dialogical Turn builds on the ideas of Donald N Levine whose extensive writings on the forms and functions of intellectual dialogue provide the point of departure for twelve original essays Written by an internationally renowned group of scholars these innovative chapters explore the dialogical possibilities for sociology both constructively and critically The contributors assess the role of sociology in the conversation across contemporary academic disciplines exploring the fundamental structural and conceptual reconstructions now taking place in sociology and neighboring fields
