Rise Of European Regionalism:

The Rise of Regional Europe Christopher Harvie, 2005-06-28 In this challenging study Harvie alters the ways in which we have traditionally surveyed the European past by setting the positive and negative aspects of the present European situation in their historical context

Europe, Regions and European Regionalism Roger Scully, Richard Wyn Jones, 2010-10-13 Europe Regions and European Regionalism examines the political role of regions and regionalism within contemporary Europe Offering an up to date analysis of regionalism with a broad empirical scope this book explores regions and regionalism in the period after the substantial enlargements of the European Union

European Regional Growth Bernard Fingleton, 2013-06-29 Looking into the future and trying to visualize long run regional disparities is difficult There is no agreed single theory to guide our model building although some insight can be gained from analysis of the past and by looking at the different theoretical positions to see if there is any agreement at least in terms of outcome if not in terms of mechanism This is what is attempted in this book which brings together specialists with a common interest in European regional growth and in applying quantitative analytical and simulation techniques in order to provide different perspectives on the topic Many of the Chapters in the book employ the methods of spatial econometrics Spatial econometrics is a suite of statistical and econometric tools dedicated to the analysis of spatial data in other words data that is set within the context of socio economic theories and which can be represented most informatively in mapped form These methods have emerged over the last half century from a series of influential papers and books in the fields of regional science spatial statistics and quantitative geography and are ripe for serious application in the context of the EU's development In particular they provide the means by which to analyze spatially indexed data where the time dimension is essentially suppressed because for instance the variables of interest are not available or are of questionable accuracy which is often the case when one is interested in regional rather than national variations across a number of countries

Innovation and Regional Growth in the European Union Riccardo Crescenzi, Andrés Rodríguez-Pose, 2011-06-17 This book investigates the EU's regional growth dynamics and in particular the reasons why peripheral and socio economically disadvantaged areas have persistently failed to catch up with the rest of the Union It shows that the capability of the knowledge based growth model to deliver its expected benefits to these areas crucially depends on tackling a specific set of socio institutional factors which prevents innovation from being effectively translated into economic growth The book takes an eclectic approach to the territorial genesis of innovation and regional growth by combining different theoretical strands into one model of empirical analysis covering the whole EU 25 An in depth comparative analysis with the United States is also included providing significant insights into the distinctive features of the European process of innovation and its territorial determinants The evidence produced in the book is extensively applied to the analysis of EU development policies

Multipolarization, South-South Cooperation and the Rise of Post-Hegemonic Governance Efe Can Gürcan, 2019-05-08 The crisis of Northern capitalism

and failure of hegemonic global governance have created a facilitative environment for post hegemonic initiatives promoting South South cooperation Major Southern countries especially the BRICS have taken the lead in pushing for alternative governance mechanisms that are strongly articulated in the areas of economic financial cultural and defense cooperation This book focuses on the historical political economic and geopolitical context in which major Southern countries implement a post hegemonic agenda Providing a global and comprehensive perspective through a series of focused case studies from Europe Latin America Eurasia and Africa the author develops a new approach to the multipolarization of world politics based on global hegemony Highly recommended for scholars students and activists involved in global political economy regionalism studies and international development this book will be of interest to anyone seeking to develop their understanding of world politics and South South cooperation

Globalization and Regional Growth in Europe Roberta Capello,Ugo Fratesi,Laura Resmini,2011-05-27 After a description of the new forms of globalization currently shaping our world and of their possible spatial effects the book highlights which European regions have in the past succeeded in taking advantage of globalization trends and identifies the major reasons for their success The book also offers a prospective analysis utilizing scenarios based on different assumptions of how globalization trends will develop identifying the regional winners and losers for each scenario The analysis greatly benefits from a unique database which contains among others data on FDI by sector and professions at the regional Nuts 2 level for all 27 EU countries A time span of more than 10 years is covered and scenarios are developed for the future development up to 2020

Regional Economic Growth, SMEs and the Wider Europe Raffaele Paci,B Fingleton,Ayda Eraydn,2017-11-22 This title was first published in 2003 This work intends to make an important and interesting contribution to the wider debate on European regional development It looks beyond the confines of the EU proper and combines interesting and relevant case studies from a broader pan European perspective Also the approaches adopted are informed by a variety of theoretical positions By addressing the changing roles of SMEs in different regions of Eastern Europe readers should gain insights into the different dimensions of SME development and the link between SMEs and regional growth

Knowledge Flows, Technological Change and Regional Growth in the European Union Małgorzata Runiewicz-Wardyn,2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU The author critically scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions

Dynamics of Regional Growth in Europe Andres Rodriguez-Pose,1998-11-19 In a period of deep economic social and political transformation regional disparities seem to be particularly resistant to change The emergence of a global economy the shift in production methods and the greater mobility

of capital labour and raw materials have not brought about a radical reshuffling of the prevailing regional disparities There is a greater concentration of economic activity in core areas and very few peripheral regions are taking advantage of the process of global restructuring The Dynamics of Regional Growth in Europe looks for the reasons behind this persistence in the social political and institutional arrangements of a large set of European regions by trying to relate two scientific approaches concerned with regional economic performance which share very little in common the literature on socio economic restructuring and structural change and neoclassical and endogenous growth theories OXFORD GEOGRAPHICAL AND ENVIRONMENTAL STUDIES AIMS TO PUBLISH THE BEST ORIGINAL RESEARCH STUDIES IN THE RELATED FIELDS OF GEOGRAPHY AND ENVIRONMENTAL STUDIES IT S SCOPE IS INTERNATIONAL PRESENTING A BROAD AND DIVERSE RANGE OF SCHOLARLY APPROACHES FROM ACROSS THE WORLD SERIES EDITORS GORDON CLARK ANDREW GOUDIE AND CERI PEACH

Governance in a Global Economy Miles Kahler, David A. Lake, 2021-08-10 Critics of globalization claim that economic integration drains political authority from states devolving authority to newly empowered regions delegating it to supranational organizations and transferring it to multinational firms and nongovernmental organizations Globalization is also attacked for forcing convergence of state institutions and policies and threatening the ability of societies to chart their own democratically determined courses In *Governance in a Global Economy* Miles Kahler and David Lake assemble the contributions of seventeen leading scholars who have systematically investigated how global economic integration produces changes of governance These authors conclude that globalization has created a new and intricate fabric of governance but one that fails to match the stark portrait of beleaguered states Exploring changes in governance across several policy areas such as tourism trade finance and fiscal and monetary policy the authors demonstrate that globalization changes the policy preferences of some actors increases the bargaining power of others and opens new institutional options for yet others By reintroducing agency and choice into our understanding of globalization this book provides important new insights into the complex and contingent effects of globalization on political authority and governance The introduction and the conclusion are by the editors the contributors are James A Caporaso Benjamin J Cohen Barry Eichengreen Zachary Elkins Geoffrey Garrett Peter Gourevitch Virginia Haufler Michael J Hiscox Robert O Keohane Lisa L Martin Walter Mattli Kathleen R McNamara Joseph S Nye Jr Jonathan Rodden Ronald Rogowski Beth A Simmons and Peter Van Houten

The European Union and Interregionalism Mr Mathew Doidge, 2013-03-28 *The European Union and Interregionalism* is the most comprehensive study of interregionalism to date providing a vigorous analysis of its role and functions in the architecture of global governance and of the place of qualitative differences between regional actors in shaping interregional relationships Regionalism itself is an established phenomenon with regional politics becoming increasingly institutionalised As a result with the EU as forerunner regions have begun to exert themselves in the external policy space developing networks of relations including prominently interregional relations We have thus seen the

emergence of a new governance space at the interregional level banded on one side by sites of global governance and on the other by governance at the regional level Important questions challenging the current literature of these interregional structures include do interregional relationships conform to theoretical expectations and what patterns of engagement and interaction are emerging within the EU s core interregional partnerships and are these replicated elsewhere Exploring interregionalism beyond the core Europe Asia partnerships including the network of relations centred on ASEAN this book should be read by all those engaged in consideration of interregional structures to understand how patterns of EU centred interregional engagement rather than being sui generis are increasingly evident in the broader network of interregional relationships

Regional Disparities in the Enlarged European Union Valentina Meliciani, 2015-10-14 The last twenty years have seen an increase in European integration and the emergence of the technological revolution Although tighter integration coupled with technological innovation should facilitate cross regional convergence some European regions have managed to jump ahead while others have been left behind This book examines the regional characteristics that favour growth and analyses the relevance of innovation socio economic and structural factors in shaping regional economic disparities In this book particular attention is devoted to the EU enlargement towards the East to its consequences on Europe's traditional North South divide and to the increasing regional disparities in new member states after the transition It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members particularly after the 2008 financial crisis It also shows that for newcomers regional disparities are essentially linked to socio economic factors as capital regions approach Western standards while others mainly old industrial regions and peripheral ones lag behind This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field

Multinational Corporations and European Regional Systems of Innovation John Cantwell, Simona

Iammarino,2005-06-27 In globalising economies particularly those going through a process of economic integration such as those economies within the EU regions forge an increasing number of linkages with other locations within and across national borders This is largely carried out by the technological efforts of Multinational Corporations MNCs This book explores the regional dimension of Europe in terms of localised technological comparative advantages and the location of innovative activities by MNCs Using an empirical analysis John Cantwell and Simona Iammarino cover such important themes as MNC technological activities and economic wealth MNCs and the regional systems of innovation in Italy UK Germany and France the geographical hierarchy across European national borders *European Regional Development*

Paweł Churski,Tomasz Herodowicz,Barbara Konecka-Szydłowska,Robert Perdał,2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author s operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004 2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels
