Throughout the Twentieth Century big business has been a basic institution Large corporations have provided a fundamental contribution to the wealth of nations and at the same time have had a remarkable impact on the political and social systems within which they have operated It is difficult to understand the development of the most advanced economies if we do not consider the specific evolution of big business in every national case On the other hand it is not possible to explain the shape and behavior of big business without considering its development as part of the history of the country in which they operate The largest US German British and French firms were key actors in favoring their nations development and even at the end of the Twentieth Century made a very important contribution to their growth In many countries a stable core of large corporations developed only relatively lately or did not develop at all and under these circumstances big business was not able to significantly participate in the economic growth of such countries Scholars who dealt with the economic history of Italy and Spain are generally unanimous in tagging these nations as industrial late comers ineffective in promoting big autochthonous private and State owned firms dominated by family companies and characterized by a strong competitive advantage on the part of small and medium sized enterprises At the same time Spanish and Italian business and economic historians have tended to say little about the role and features of big business This book thus fills a significant gap in the work on the development of Southern European capitalism and its large corporations by analyzing the Italian and Spanish cases and comparing them with each other and with what has occurred in the United States and in the largest European nations Examining both the macro dynamics national but also supra national and the micro level utilizing samples of big corporations and going deeply into some company cases this volume identifies some important protagonists of the Italian and Spanish economies such as the State families and foreign investors and investigates a wider panorama which includes the political economic and social relationships of the corporations providing insights into the form of capitalism that exists in these countries

European economic history and more specifically Spanish economic history *Building a Global Bank* Mauro F.

Guillén, Adrian Tschoegl, 2008-07-01 In 2004 Spain's Banco Santander purchased Britain's Abbey National Bank in a deal valued at fifteen billion dollars an acquisition that made Santander one of the ten largest financial institutions in the world. Here Mauro Guillén and Adrian Tschoegl tackle the question of how this once sleepy family-run provincial bank in a developing economy transformed itself into a financial services group with more than sixty-six million customers on three continents. Founded 150 years ago in the Spanish port city of the same name, Santander is the only large bank in the world where three successive generations of one family have led top management and the board of directors. But Santander is fully modern. Drawing on rich data and in-depth interviews with family members and managers, Guillén and Tschoegl reveal how strategic decisions by the family and complex political, social, technological, and economic forces drove Santander's unprecedented rise to global prominence. The authors place the bank in this competitive milieu, comparing it with its rivals in Europe and America and showing how Santander faced with growing competition in Spain and Europe sought growth opportunities in Latin America and elsewhere. They also address the complexities of managerial succession and family leadership and weigh the implications of Santander's stellar rise for the consolidation of European banking. *Building a Global Bank* tells the fascinating story behind this powerful corporation's remarkable transformation and of the family behind it.
